

Garden Shed

Potting Shed

Summer House

## Tools Required

Modellers Knife (with a fresh blade)

Cutting Mat

Modelling Glue (we recommend Deluxe Materials Roket Card Glue)

Fine Tip Applicator

Low-tac Masking Tape

Clips / Clamps

## Tips

Prior to starting your build, we recommend reading through the instructions to familiarise yourself with the build style of the kit.

We recommend painting any white edges as you remove the components from the sheet to improve the finished look. We advise watercolour paints for the best finish.

Each component is held in the sheet using score lines, indicated by a scissor symbol. To remove the component from the sheet, carefully run the tip of your modelling knife through the score line.

Remove each component as it is required to prevent losing or mixing it up with another component.

Ensure that glue is distributed evenly and not too close to the edge as it may ooze out when pressure is applied.

Use low-tac masking tape, clamps and weights to aid the assembly process.

# Garden Shed

1. Detach component A and place it face down on your work surface. Then cut out the window on the glazing sheet and glue it into position.

2. Fold component A along the crease lines and glue. Next, detach component B (base) and apply a bead of glue around the edges. Then, position the base within the walls.

 We recommend using ATD low-tac masking tape to assist on this step whilst the glue cures.

3. Detach component C, fold it along the crease line and then glue it to the shed. Next, detach component D (x2) and glue them to the front and back of the shed, as per the illustration to the right.

 We recommend using ATD low-tac masking tape to assist on this step whilst the glue cures.

## Potting Shed

1. Detach component F and place it face down on your work surface. Then cut out the window on the glazing sheet and glue it into position.

2. Fold component F along the crease lines and glue. Next, detach component G (base) and apply a bead of glue around the edges. Then, position the base within the walls.

 We recommend using ATD low-tac masking tape to assist on this step whilst the glue cures.

3. Detach component H, fold it along the crease line and then glue it to the shed.

 We recommend using ATD low-tac masking tape to assist on this step whilst the glue cures.

## Summer House

1. Detach component I and place it face down on your work surface. Then cut out the windows on the glazing sheet and glue it into position.

2. Fold component I along the crease lines and glue. Next, detach component J (base) and apply a bead of glue around the edges. Then, position the base within the walls.

We recommend using ATD low-tac masking tape to assist on this step whilst the glue cures.

2. Detach component K, fold it along the crease line and then glue it to the shed. Next, detach component D (x2) and glue them to the front and back of the shed, as per the illustration to the right.

We recommend using ATD low-tac masking tape to assist on this step whilst the glue cures.

You have now completed all three shed kits. We hope you enjoyed and successfully built the kit! To view our other card kits, more products and find your local stockist, visit [www.atdmodels.co.uk](http://www.atdmodels.co.uk)

We'd love to see photos of your finished models. Please send them to [enquiries@atdmodels.co.uk](mailto:enquiries@atdmodels.co.uk) for a chance to be featured on our social media pages.
