Focus Theme 2022
'Everything That's Fun!'

Everything That's Fun!

HO, TT and N Figures

This year, NOCH celebrates its 111th birthday. We would love to mark this special anniversary with you. On the 27th and 28th May 2022, we will hold an open day with a flea market at our factory in Wangen (more on the back of this brochure).

In order to celebrate the anniversary with our products, too, we have chosen the focus theme of 'Everything That's Fun'. You'll find a lot of unusual and charming subjects such as the Bobby Car Race, Street Artists or special Cyclists among our new items in the Figures range this year.

Expected release: March 2022

Fairytale Figures for imaginative scenes

Finally, characters from the most famous fairy tales are also available in miniature. No matter whether you're building a fairytale forest as an attraction or re-enacting a film shoot with the five Figures Sets, these imaginative figures can easily and realistically be used on your model railway layout. Find the matching Witch's House on page 39.

History highlight: Our Figures are produced for you in our factory in Ho Chi Minh City (formerly Saigon) in Vietnam. NOCH Asia has grown rapidly since it was founded in 2009. By now, we employ around 200 colleagues on site. In this way, we can not only ensure high quality in the design and detailed painting of NOCH products for the discerning railway modeller, but also implement our high standards regarding, for example, fair working hours and pay for our colleagues in Vietnam. This enables us to fulfil our responsibility for the local people

directly. In 2021, we consequently also joined the FTO, the Fair Toys Organisation, to ensure even more transparency in our production processes. Further info about our subsidiary, NOCH Asia, and about the FTO, can be found on our new website at www.noch.com in the 'This is NOCH' section.

Figures for the Large Gauges

Figures in G and 1 Gauge

We are expanding our small but refined range of 1- and G-gauge figures with a few new sets. The new figures are ideal for designing village and nature scenes since our figures so far have been thematically located near the train station.

Expected release:

1-gauge: November 2022

G-gauge: Dezember 2022

Note: in the production of our G-gauge and 1-gauge figures, a new production process is used that guarantees high breaking strength.

We Have Even More for You

Figures in G and 1 Gauge

Our little assortment of figures for the large gauges is constantly growing. Here you can see the figures that are already available. The gauge 1 figures are shown. The corresponding G-gauge figures are even more elaborately painted, as the picture in the box shows.

Incidentally, all G-gauge and 1-gauge figures are manufactured using a new production process that ensures that they have a high breaking strength.

Weatherproof!

H0, TT and N Gauge Figures Advent Calendar

 With its beautiful cover picture, the Figures Advent Calendar in A3 format is an absolute eyecatcher. You can look forward to a new figure when you open a little door every day – an ideal gift for any modeller!

Expected release: October 2022

Note: There are model railway figures in the calendar, but no winter or Christmas figures. Further information on the new Figures Advent Calendar will be published in autumn 2021.

Our new Figures Advent Calendar comes out in October 2022!

History highlight: Back in 2009, NOCH launched the first edition of the Figures Advent Calendar for modelling fans of H0, TT and N gauges. Since then, a calendar has been published every year with a new compilation of figures and a new, beautiful winter or Christmas motif. Our Advent Calendars are very popular, which is certainly also owing to the great picture motifs. The dioramas for the photos are sometimes built specially for the Advent Calendars, requiring a great deal of money and effort. We could save ourselves the hassle, but we're of the view that it's worth the effort.

Architecture Line

We have developed a small range of white figures in 1:100 scale specially for architecture modellers. These are ideal for designing unostentatious architectural models.

Expected release: March 2022

16001 Pedestrians, white, Architecture Line 1:100

H0 Straw Bales

The dried stalks that are left over when grain is harvested are called straw. It is pressed into bales to make it easier to transport and to save space. In agriculture, straw is used as feed and bedding. But it is also used as insulation in construction, fuel or raw material for huts, mats and baskets.

The pack contains 36 model straw bales, each 0.5 cm x 0.8 cm x 1.2 cm in size.

Expected release: October 2022

For Modelling Pros Who Demand Quality and Innovation!

Sound Scenes

We're excited about the new additions to the NOCH Sound Scenes: alongside bleating sheep, track workers and motorbikes will now also make a racket in your model landscape!

The connection is made via a standard 16 V model railway transformer. The sound has a duration of approx. 20 seconds. Suitable for AC and DC.

Expected release: August 2022

Video clip

Video clip

Video clip

History highlight: NOCH invented the Sound Scenes in 2015. A little innovation! The lovingly designed and detailed painted NOCH Figures are delivered combined with a small loudspeaker, which provides high-quality sound for the discerning modelling professional to support the represented scene acoustically. During the conception phase, it was originally planned to equip the Sound Scenes with a simple 'greetings card speaker'. However, the quality didn't convince us, which is why we decided to equip the NOCH Sound Scenes with a high-quality

'Rat-a-tack-tack, beep!'

Makes the typical noises heard on a track construction site as well as an automatic track warning system.

loudspeaker. The sound box contained in the set is a component that was specially developed to give the sound from the small loudspeaker more surround sound and at the same time serve as a mount. Suitable screws are also included. To reduce the volume, a resistor is also available in the NOCH online shop at www.noch.com.

An Ornament for Any Square!

City Fountain

Fountains can be found in virtually every village and market square and create a unique atmosphere. Whether it's a village fête, a market or gastronomy, village life mostly revolves around the central fountain.

The City Fountain for H0 gauge is a particularly attractive object. The fountain has a footprint of 10 cm x 10 cm and is 7.5 cm high including the statue.

The statue on the fountain represents a Valkyrie and is 3.5 cm high. Valkyries originate from Norse mythology and can often be found as statues or fountain figures.

The fountain itself is made of the well-known NOCH Structured Hard Foam. The statue is created using a 3D printing process. Both the fountain and the Valkyrie are elaborately handcoloured.

Expected release: November 2022

Jürgen Hauser
Authorised Officer

The Fountain is my favourite new item. There are many unique fountains in countless cities. Some of them are world-famous. Give your model city centre a very special highlight.

H0 66455 City Fountain
 10 cm wide, 10 cm deep, overall 7.5 cm high
 (height of Valkyrie 3.5 cm)

NEW

Craft Tip:
How water gets into the fountain

If you want to make your model even more realistic, you can bring the fountain to life with 'water' by using NOCH 2K Water Gel (ref. 60870) and NOCH Aqua Effects (ref. 60872).

Ideal 'carriers' for splashing water can be cut out of a transparent sheet (e.g. plastic packing material).

Glue the thin strips in the water outlets.

Then pour NOCH 2K Water Gel into the basin of the fountain.

Once hardened, NOCH Aqua Effects is dabbed onto the surface and the strips.

The final details are added with NOCH Foam & Spume (ref. 60862).

Design Perfect Model Plots of Land

Handpainted plastic walls

The plastic Walls are perfectly suited to enclosing buildings, fields, properties, gardens and much more. The Walls are formed using a plastic injection moulding process and are thus stable and durable.

They look very natural because they are elaborately handcoloured in multiple colours.

Each set contains twelve parts: four wall elements, each with a pillar; three wall elements without pillars; and five individual pillars.

We recommend a small saw (e.g. PUK saw) and all-purpose glue, superglue or hot glue for processing. NOCH Detail Markers (ref. 61155) or Weathering Powder (ref. 61169) are ideally suited to adding some colour details afterwards.

Expected release: December 2022

HO 13170 Quarrystone Wall
12 parts, total length 72 cm, wall height 1.6 cm
pillar height 2.2 cm

Lively Scenes for Your Model Landscape

H0 Themed Figures Set

This year, everything in our themed worlds revolves around 'trade and commerce'. The Themed Figures Sets make your model scenes come alive, as the lovingly designed figures and matching accessories are elaborately handpainted and each depict a self-contained scene.

Expected release: November 2022

Tip: view the Themed Figures Sets on our website, www.noch.com. You'll find many additional decoration ideas relating to the individual scenes there.

Montserrat Garcia Export

It's so easy to reconstruct any scene with the Themed Figures! No more excuses; so many details make it so much fun!

Themed Figures Set 'Toy Shop'

Do you remember your childhood? What was the most important business in town back then? The toy shop, of course! As children, we pressed our noses against the window and admired the colourful, diverse offerings. Then, as now, mothers and fathers try to get their offspring to move on, but the colourful toy world is simply too alluring.

Dr. Rainer Noch
CEO

My favourite new item are these pieces of realistically moving Playground Equipment with matching children's figures. What a great memory of your own childhood.

Now Movement Comes into Play!

micro-motion Children's Playground

Almost all of us should have fond childhood memories of playgrounds and individual pieces of playground equipment. The swing on which we were often pushed for hours by our parents; the roundabout that made us feel dizzy, or the seesaw that was so difficult to balance on.

Playgrounds can be found in every city and village and are therefore an important part of human coexistence. Families meet, children laugh and play, parents talk about work and parenting, and some of the latest items of gossip and tittle-tattle are exchanged while their offspring have a go on the swings.

After last year's smash hit, the Tree with Swing (ref. 21768, see also page 27), we set out to develop four moveable pieces of playground equipment: a seesaw, a classic swing, a bird's nest swing and a roundabout.

The handpainted playground equipment and model figures come completely assembled. Each device is powered by a motor that is located directly underneath the model (installation depth 3.5 cm). The mechanism for the drive is supplied as a kit. The electronics supplied can be connected to a standard 16 V model railway transformer and are suitable for AC and DC. The speed of the playground equipment can be set on the circuit board.

Expected release: December 2022

... wie im Original

111 Years of NOCH

A Reason to Celebrate and Give Thanks!

Dear friends and fans of the NOCH brand,

NOCH turns 111 years old this year. Wow! What a long time! It's a journey which – to use the same metaphor – can be compared to a train ride.

The journey started in 1911 in a small town called Glauchau in Saxony. My great-grandfather Oswald Noch founded the company as a plumber's workshop there. When his son – my grandfather – Erich boarded the train, he expanded the business to include his expertise in electronics in the mid-1930s. Before you knew it, toy locomotives were also being repaired in the shop. And since these were already at hand, accessories were soon being offered. Initially, alongside wagons and rails, there were also terrain parts and buildings.

As it happens, unfortunately there are also hard times, and the train of life went through a very dark tunnel in history in the late 1930s and 1940s. After the war and the threat of nationalisation of the company in the former GDR (German Democratic Republic), light could finally be seen at the end of the tunnel again. In the mid-1950s, the Noch family found themselves with relatives in Munich.

However, large machines couldn't be taken to the West; only small tools and lots of good ideas could be saved and taken along. And so it comes as no surprise that NOCH now concentrated on the manufacture of handcrafted landscape parts and accessories.

In the early 1960s, they moved lock, stock and barrel one last time to Wangen in the beautiful Allgäu. In the 1970s and '80s, my grandfather and my father, Peter, expanded the company. I joined the management board myself in 1997, and since then have taken great pleasure in shaping the company, brand and many products with my colleagues.

It's said that "In Wangen bleibt man hängen" ("One gets stuck in Wangen") and so anyone who comes here never leaves. The beautiful Allgäu landscape gives us a whole host of suggestions, great ideas, and lots of inspiration for realistic model landscaping products in summer and winter, which we gladly manufacture for you.

We're very grateful that we were able to travel here with you and look forward to many more years! Lean back and enjoy the view of the (model) landscape!

*Yours,
Dr Rainer Noch*

PS: We would like to celebrate the anniversary with you on 27th and 28th May 2022. Look forward to it and soon find more information at www.noch.com.

Nature Reclaims Itself!

Abandoned Places made of NOCH Hard Foam, handcoloured and refined

We are always fascinated by nature. Especially when it reclaims places we humans have laid claim to ourselves. So-called 'lost places' have long since become an attraction. We stay behind in these places not really wanting to believe what we are becoming aware of: that our existence on the planet is brief. This showdown between man and nature fascinates us. Deep down, we know that nature always wins in the end, and will also outlast us humans.

The sets in the 'Abandoned Places' series each consist of a finished model made of NOCH Hard Foam, one or two handmade twisted wire trees and high-quality painted and 3D-printed accessories. You can arrange the compilations according to your setup requirements.

The models designed in this way are highlights for every model landscape and attract everyone's attention.

In October 2022, three models for H0 gauge as well as one model each for TT and N gauge will be released. You can get these exclusively from participating dealers as part of the NOCH Season Promotion.

The dealers offering these highlights in autumn can be found on our website from around September.

Expected release: October 2022

Fountain H0: 16.5 cm x 12 cm, 7.5 cm high
 height of statue 4 cm
 Fountain TT: 12.8 cm x 9.3 cm, 5.5 cm high
 height of statue 2.8 cm
 Fountain N: 9.7 cm x 7.1 cm, 3.7 cm high
 height of statue 2 cm
 2 'Birch Tree' twisted wire trees: each 15 cm high

Abandoned Place 'Fountain'

Abandoned cities or villages are particularly fascinating to us. Because nowhere other than in a so-called ghost town are we aware that this place was once a hive of activity, of which nothing remains today. Deserted villages are eerily beautiful! And our well was also unable to withstand the involuntary renaturalisation. Trees, shrubs and many other plants proliferate, creep and grow where people once relaxed by watching the water feature.

Available exclusively at participating NOCH dealers from October 2022. More info from September 2022 at www.noch.com

Abandoned Place 'Adit'

 Regardless of whether it's coal, ore, precious metals or even diamonds, as soon as humans discovered mineral resources in sufficient quantities, they set about mining them. But when the mines no longer yield anything, humans move on and leave nature to its own devices.

And it immediately sets about reclaiming its territory! Shut-off devices such as a padlock and bolt or a secure iron gate are useless in this scenario. In the end, the setting will go back to being covered with virgin forest!

HO **60762** **Abandoned Place 'Adit'** NEW

Bring Some Colour into Model Nature!

Flowers

Flowers can be found virtually everywhere. For example, roses, tulips, dahlias and daffodils are specifically planted in gardens and flower beds. But we can also find daisies, primroses, cornflowers, lavender and many other colourful species in the great outdoors, at the edge of forests or paths and by streams and ponds.

Our Flowers are a wonderful little innovation: in a bed made of 4 mm-long green fibres are some 9 mm-long fibres that have been flocked in colour. In this way, wonderfully natural-looking flower beds can be reproduced in a model.

Each of the two sets contains a total of 250 flowers in five different colours.

The colours of the flowers in the set with reference 06800 are more colourful overall. With this set, tulips, roses, narcissi, daisies, daffodils, dahlias, and many more can be planted in a model.

The colours of the blossoms in the set with reference 06805 are slightly more muted and thus ideal for less flashy flowers. They are therefore suitable for cornflowers, lavender, forget-me-nots and various forest and meadow flowers. The Flowers are removed from the box and fixed in the model landscape with a drop of adhesive.

We recommend you use NOCH Landscaping Glue (ref. 61133), but hot glue or all-purpose glue are also ideally suited.

Expected release: October 2022

06800 Flowers

250 pieces, red, blue, yellow, pink and white

06805 Flowers

250 pieces, green and yellow, blue and white heather, cornflowers, lavender

Craft Tip:
Processing the Flowers

The Flowers are removed from the pack ...

... and put in the model scene with Landscaping Glue.

Ideal for Realistic Bushes and Overgrown Hedges

PROFI Bushes

In contrast to neatly mown lawns and meticulously cut bushes and hedges, free-growing nature flourishes in the light and is barely confined in its thirst for growth.

For railway modellers, depicting free-growing nature in a model is a huge challenge.

This can be realised perfectly with PROFi Bushes. PROFi Bushes are suitable for reproducing both flat, intensive undergrowth such as brambles, or even higher, dense bushes in a model.

The super realistic Bushes' backing material is a natural fibre that is stable and malleable. It was flocked with a special mixture of NOCH Leaves and NOCH Structured Flock for a natural optical effect. This gives us a unique product that is ideal for depicting dense model vegetation.

Expected release: June 2022

07310 PROFi Bushes, Medium Green, 40 g

NEW

07311 PROFi Bushes, Dark Green, 40 g

NEW

Craft Tip: Processing PROFi Bushes

This amount of PROFi Bushes is in the packaging.

The PROFi Bushes material is pulled apart with your fingers and shaped to create dense groundcover and small or large bushes.

It is then glued into the model landscape using Grass Glue (ref. 61130) or Landscaping Glue (ref. 61133).

Timber!

micro-motion Falling Tree 'Fir Tree'

Model scenes frequently captivate people with little gimmicks and surprises that they don't suspect at first glance. The Falling Tree is just such a gimmick. The viewer is very surprised when an imposing 17 cm tree falls to the ground completely unexpectedly at the edge of the forest.

The trick behind this is extremely simple: there is a servo under the tree that brings it down realistically; slowly at first, and then faster until the tree finally hits the ground. After about 8 seconds, the tree stands up again on its own.

HO TT 21775 *micro-motion Falling Tree 'Fir Tree'*
Overall 18.2 cm high (height of fir tree 17 cm;
installation depth for drive 1.2 cm)

NEW

The Falling Tree is an impressive, extremely realistically handmade, twisted wire tree that is elaborately flocked. The electronics supplied can be connected to a commercially available 16 V model railway transformer and are suitable for AC and DC.
Expected release: September 2022

Matching accessories:

This is how you make the scene even more realistic

The HO Sound Scene 'Felling Trees' (ref. 12843) is a great addition to the Falling Tree.

The original set contains six lumberjacks wearing helmets and protective clothing as well as the sound electronics with a loudspeaker. Since the loudspeaker is installed directly next to the Falling Tree (e.g. in a bush, in the ground or in a small hut), the viewer has the impression that the sound is created in the scene.

Realistic tree-felling noises such as chainsaws etc. can be heard for about 20 seconds when the sound is activated.

The Sound Scene electronics can also be connected to a commercially available 16 V model railway transformer.

Makes the sound of a chainsaw with a starter.

HO 12843 *Felling Trees*

N 12956 *Felling Trees*

Childhood Memories Are Awakened!

TT and N Gauge micro-motion Tree with Swing

Our H0 new item highlight of 2021 is now also available for fans of TT gauge and N gauge.

It's summer and a beautiful sunny day is coming to an end. While Mum prepares dinner, the little daughter swings enthusiastically on the swing, which Dad hung on her favourite tree for Easter. The scene in which our Tree with Swing is called into action could look something like this. It is a fascinating micro-motion product that awakens wonderful childhood memories. The bottommost branch of the mighty oak holds a swing, on which a little girl is sitting.

The Tree with Swing is supplied ready for installation. The drive consists of a motor and a gearbox and is located under the tree (installation depth approx. 3.5 cm). The electronics supplied can be connected to a standard 16 V model railway transformer and are suitable for AC and DC. The speed of the swinging movement can be set on the circuit board. **Expected release: December 2022**

TT 21771 micro-motion Tree with Swing **NEW**
 Overall 15.5 cm high
 (height of tree 12 cm; installation depth for drive 3.5 cm)

N 21769 micro-motion Tree with Swing **NEW**
 Overall 12.5 cm high
 (height of tree 9 cm; installation depth for drive 3.5 cm)

Tip: H0 Gauge
 micro-motion Tree with Swing

The Tree with Swing is available for H0 gauge as ref. 21768.

Lena-Marie Nohr
 Trainee, Graphics
 I think the Tree with Swing is wonderful, as it reminds you of great experiences in warm summer.

We're Reforesting!

H0 and TT Saplings with Tree Props

Newly planted trees don't yet have well-branched roots in the soil to give them stability. Saplings are thus exposed to strong winds without protection and any movements of the root ball can jeopardise their growth. That's why any newly planted tree should be propped up.

Expected release: October 2022

H0 TT 21538 Saplings with Tree Props
6 pieces, 4 cm high

NEW

H0 TT 21532 Plantation Trees with Apples
12 pieces, 3.5 cm high

Safe in Bed!

HO and N PROFI Ballast Beds

NOCH PROFI Ballast Beds meet the highest standards of professional railway modellers in terms of quality and appearance. It's probably also the easiest way to make a super realistic track bed. The track's sleepers are simply pressed into the foam track bed. It's possible to use NOCH Latex Adhesive (ref. 61135) or a 'floating installation', where the track is screwed directly onto the base plate or railway route through the track bed. In order to provide points, crossings and other special tracks with a ballast bed, unballasted NOCH PROFI Plates for Ballast Beds and the fitting NOCH PROFI Ballast in grey and brown are available individually in both gauges. NOCH Ballast Glue (ref. 61134) is ideal for adding ballast. **Expected release: May 2022**

The Ballast Beds in HO gauge are suitable for all common sleeper tracks without their own beds from all manufacturers (e.g. Märklin, Fleischmann, PIKO, PECO, Roco, etc.).

The Ballast Beds in N gauge are suitable for all common sleeper tracks without their own beds from all manufacturers (e.g. Minitrix, Arnold, etc.).

HO 50510 PROFI Ballast Bed, grey NEW

NEW **N** **Z** **09180** PROFI Ballast
grey, 250 g bag

N **Z** **09181** PROFI Ballast
brown, 250 g bag

NEW

Craft Tip:
It's so easy to design your super realistic Ballast Bed

Cut PROFI Ballast Bed to size
with a pair of scissors.

Simply press the track into the PROFI Ballast Bed.

Screw the rail to the base plate or railway route.

Video clip

**Azariah Mertens
Modeller**
I find this set brilliant because it has everything you need to start building an Easy-Track layout straight away.

The Ideal Start on the Way to Your Own Model Railway Layout!

Starter Set 'Model Railway Layout Construction'

Having a model railway is one of the nicest hobbies in the world. In addition to an enthusiasm for technology, all things miniature and movement, it's chiefly about creating your own perfect little world. This also makes building a model railway layout a leisure activity the whole family can participate in.

So that you can get building your own model railway quickly and safely, we have put together all the products you'll need to get started in this set.

With this Starter Set and a NOCH Easy-Track layout kit, you're perfectly equipped to bring your miniature world to life with tunnels, a bridge, meadows, mountains, roads, a lake and lots of decorations. You'll find many other items with which you can design your model railway in the large NOCH range. Just get cracking and let your imagination run wild.

Expected release: September 2022

Savings of more than 10%*

* Compared to the individual purchase

Once the rails have been laid, tunnel portals and a bridge are installed.

The bridgeheads are clad in wall sheets.

The terrain quickly takes shape with NOCH TERRA-FORM.

Rock compound and paint bring life to the model landscape.

It gets even more realistic with grass fibres and lake film!

Finally, the model landscape is decorated according to your wishes.

Contents of the Starter Set 'Model Railway Layout Construction'	
1 x	TERRA-FORM Wooden Support Pole, 40 cm long, 35 pieces (ref. 61650)
1 x	TERRA-FORM Connector Pieces, 72 pieces (ref. 61630)
2 x	Landscape Crepe Paper, 90 cm x 80 cm (ref. 60840)
1 x	Rock-Compound 'Granite', Grey, 400 g (ref. 60880)
2 x	Tunnel Portal, Single Track, 2 pieces each** (ref. 60010)
1 x	Box-Girder Bridge (ref. 21320)
3 x	3D Cardboard Sheet 'Quarystone Wall' (ref. 56640)
2 x	3D Cardboard Sheet 'Old Town Pavement' (ref. 56721)
1 x	Acrylic Color, Matt, Gray, 90 ml (ref. 61196)
1 x	Acrylic Color, Matt, Light Green, 90 ml (ref. 61194)
1 x	Grass Glue, 250 g (ref. 61130)
1 x	Puffer Bottle (ref. 08100)
1 x	Scatter Grass 'Spring Meadow', 2.5 mm, 100 g (ref. 50210)
1 x	Lake Film, Blue, 41 cm x 26 cm (ref. 60850)
1 x	Sandstone Boulders, 250 g (ref. 09216)
1 x	Mixed Forest, 10 pieces, 5 – 14 cm high (ref. 26911)
1 x	Lichen, autumn mix, 35 g (ref. 08630)
40 x	Grass Tufts, assorted

**4 tunnel portals in total are included in the set.

**HO 60804 Starter Set
'Model Railway Layout Construction'**

Every Beginning Is Easy!

Vegetation Starter Sets

The application requirements for different types of vegetation in the model landscape are as wide as a model shop's range of offerings. Sometimes it's hard to decide which colours and materials to use. In order to make your decision easier and recommend the right NOCH materials for the various applications, our modellers have put together special Vegetation Starter Sets for you. Inside each set is a selection of products to suit the various topics. So, you can start right away and experience the effect and application of the materials. The products are suitable for all gauges.

We made an effort to present as many products as possible in every Vegetation Starter Set. The quantities are sufficient for smaller areas. Since the item numbers are indicated on all the packaging and products, individual items can be purchased later at any time. In addition, each set offers a saving of at least 10% when compared to buying the products separately. Have fun discovering the variety and possible applications of these NOCH products!

Already available at your local dealer.

Saving of 10 %*

Vegetation Starter Set 'Meadow'

You can implement the basic flocking of a small meadow with the contents of the set. It doesn't matter whether it's meant to be a wild meadow or even a paddock or pasture for animals. You can also recreate bald patches in the grassy area with the brown Scatter Material. Just go ahead and give the products a try!

60771 Vegetation Starter Set 'Meadow'

Contents: Scatter Grass Meadow, 20 g
Scatter Grass, light green, 20 g
Structured Flock, light green, medium, 15 g
Scatter Material, brown, 42 g
Grass Tufts Meadow, 42 pieces, 9 mm

Vegetation Starter Set 'Forest'

We noticed that many customers kept asking how to professionally design a forest floor. That was enough reason for us to put together a suitable Vegetation Starter Set. With matching Scatter Grass, Scatter Material and Structured Flock in muted, dark colours, a perfect base is created in next to no time! Details, e. g. moss and other groundcover, can then be incorporated with the olive-green foliage.

60772 Vegetation Starter Set 'Forest'

Contents:
Scatter Grass Forest Floor, 20 g
Structured Flock, dark green, coarse, 10 g
Scatter Material, brown, 42 g
Foliage, olive green

*All sets offer a saving of at least 10% when compared to the individual purchase

Vegetation Starter Set 'At the Wayside'

As mundane as it may sound, straight waysides are not so easy to reproduce perfectly in a model. During one of your next walks, observe what is sprouting up and growing around you! You'll be surprised at the variety. As well as gravel, with which you can design the path, the set accordingly contains a lot of grasses, tufts and scatter material.

60773 Vegetation Starter Set 'At the Wayside'

Contents:
 Gravel, 250 g
 Rubble, fine, 80 g
 Scatter Grass Meadow, 20 g
 Scatter Grass, beige, 20 g
 Grass Tufts Field Plants, 42 pieces
 Scatter Material, brown, 42 g

Vegetation Starter Set 'On the Bank'

Modelling the bank of every lake and river requires extra special attention! So that the transitions between water and land work perfectly, Scatter Grass and Sand, as well as some Grass Tufts, are included in the set. This allows you to decorate the vegetation on the bank in detail and achieve a convincing result!

60774 Vegetation Starter Set 'On the Bank'

Contents:
 Sand, medium, 250 g
 Grass Tufts Meadow, 42 pieces, 9 mm
 Grass Tufts, blooming yellow, 42 pieces, 9 mm
 Scatter Grass Spring Meadow, 20 g

Vegetation Starter Set 'Railway Embankment'

No railway modeller can get around it: a railway embankment and its corresponding vegetation belong on every layout! Real-life railway embankments are usually overgrown and yet still (usually) rudimentarily maintained. The vegetation with grasses, groundcover and tendrils contributes towards the stabilisation of the railway embankment and thus to the operational safety of the line. With the Vegetation Starter Set by NOCH, you'll have everything at hand from the beginning!

60775 Vegetation Starter Set 'Railway Embankment'

Contents:
 Scatter Grass, light green, 20 g
 Scatter Grass, beige, 20 g
 Wild Grass Foliage, light green
 Structured Flock, medium green, medium

Relics of the Past

Hard foam finished models

The esteemed plaster modelling artist Manfred Luft has lent a hand again and created these two 'relics of the past'. The Burial Mound from the dim and distant past will be particularly fascinating for hobby archaeologists and researchers. The Car Graveyard, however, is sure to send a cold shiver down the spine of any classic car fan when placed correctly in the model landscape – but is also an absolute eyecatcher!

The finished models are made of NOCH hard foam, painted, and can be installed as they are.

Already available at your local dealer.

Everything you need to design the whole theme is inside!

...Just like the original: the real thing is in Uhldingen on Lake Constance.

What Could Be Nicer Than a Hiking Trip?

Scenery Set 'Hiking Trip to the Witch's House'

It's the weekend, so you're finally free, and even the weather is playing along! Clearly, the whole family is drawn to going on a hiking trip in the fresh air. A special destination for the excursion is the 'Witch's House'. This little forest hut is located in a beautiful local recreation area which invites you to rest and recharge your batteries in the forest. By the way, the model for the little hut is in Uhldingen on Lake Constance.

Already available at your local dealer.

Sheer Quality of Life: Life in a Small Town!

Studies show that people particularly like to live in small towns. Because, true to our focus theme this year of 'Everything That's Fun!', there's a lot to marvel at.

From cafés and shops at the market square, to amiable people and bustling city life, to a little idyll in a tranquil detached house, everything that makes you happy is offered.

And if you want to go on a trip and explore the big, wide world, you simply board the train at the small station!

NOCH's small town is of course a delight in a figurative sense, too, because buildings for the small town appear as models in H0 and N gauge! You'll discover our new laser-cut models on the following pages.

History highlight: As early as the 1930s, model buildings were manufactured and offered by NOCH. Since 2010 we've been breaking new ground with model kits which are lasered from special card. These are particularly stable and resistant to ageing. The individual components are partially also then coloured by hand. Production takes place at the main factory in Wangen im Allgäu and many NOCH models have already won accolades and prizes.

For example, the Wine Estate 'Hauser-Bühler', micro-motion Rock Concert, Gravel Works, and many other models have been awarded prizes by the trade press and modellers. Besides the great optics that the matte card parts offer compared to plastic model kits, they are also trailblazers in the field of sustainability, of course!

**Finally Also Available in N Gauge:
Laser-Cut Kit Station 'Amtzell'**

This wonderful little station is equipped with lots of lovely details. In addition to the main building, the model depicts a small baggage area and goods office as well as a covered waiting area. Amtzell Station is already available in the NOCH range in HO gauge, and the N-gauge version is now being added. This means that in future, trains will be able to call at villages and small towns in N gauge as well.

Expected release:

HO-gauge model (ref. 66001):

already available at your local dealer.

N-gauge model (ref. 63001): September 2022

HO 66001 'Amtzell' Train Stop

NOCH's Next Top Model!

Fashion Shop with micro-motion Fashion Show

The local traditional fashion boutique presents the latest collections at the market square of our small town. The models first do their rounds in intoxicating evening wear and then present breathtaking lingerie.

The Fashion Boutique is designed as a laser-cut kit. Thanks to the underfloor drive, up to four model figures move simultaneously through the building and past the enthusiastic audience beforehand. The figures are simply placed on the catwalk and are held in place by an integrated magnet. Four more figures without magnets are included in the model kit and can be used as desired to design and decorate the scenery.

The model is limited to 1000 copies. A numbered certificate, detailed instructions and special Laser-Cut Adhesive are included.

Expected release: November 2022

History highlight:

A NOCH limited edition model has been released annually since 2013. These model kits are clever, amusing ideas that are strictly limited to 1000 copies, usually with movement or light effects.

The following have been released so far:

2013: micro-motion Table Dance Bar 'Eden'

2014: micro-motion Rock Concert

2015: micro-motion Open-Air Film Festival

2016: Football Pitch with Clubhouse, micro-sound Stand and Floodlights

2017: micro-motion Rock Festival

2018: Haunted House with micro-sound Ghost Wailing and Light Effects

2019: Alpine Hut 'Christl' with micro-motion Waitress

2020: micro-motion Cross-Country Ski Trail with Après-Ski Cabin

2021: Burning Brothel with micro-sound and Light Effects

Developed by a Pro to Make It Easy for You to Get Started!

H0 NOCH Easy-Track Railway Route Kit 'Martinstadt'

The well-known YouTuber Martin Tärnrot (also see info box on page 52) has developed his own Easy-Track layout exclusively for NOCH. And it has what it takes! The well-conceived route plan invites you to drive, shunt, transport goods and travel by train. As well as a winding circuit with branches, sidings are earmarked for the railway station area. Industrial

complexes can thus be connected, or a small station can be reached. There's no limit to your imagination when it comes to implementing your ideas.

Expected release: October 2022

H0 53610 Easy-Track Railway Route Kit 'Martinstadt'

NEW

Outer dimensions of constructed routes:
243 cm x 148 cm, height 13.8 cm
Minimum floorspace required for assembly:
250 cm x 150 cm

History highlight: NOCH is one of the pioneers of model railway layout construction! In the 1960s, bit by bit, the company set up a large number of different preformed layouts in various sizes and for many different gauges. Despite fierce competition in the market, these 'NOCH Preformed Layouts' became the generic term in subsequent years when it came to building a model railway. NOCH presented the 'Karlsberg', the first Easy-Track layout kit in H0 gauge, at the trade fair in Nuremberg in 2020. The response from customers was overwhelming and as a result the range will be expanded with additional layouts in H0 gauge

and, for the first time, a layout in N gauge in 2022. What's special about the layout kits is that these quick and easy-to-assemble kits relieve the use of many problems when building a layout and also provide plenty of room for customisation. We really hope you're just as excited about the new product line as we are!

Besides individual parts for assembling the railway route system, the kit also contains the Easy-Track Guidebook „Andreastal“, in which the construction of a layout is clearly explained step by step.

Content Easy-Track Railway Route Kit 'Martinstadt':

- 1:1 plot track plan
- Track plans for Märklin C-/K-Track, Trix C-Track, PIKO A-Track and Roco Line without bed
- 97 pillars; maximum pillar height 13.4 cm, minimum pillar height 2.6 cm
- 8 circle segments, 30°, 80 mm wide
- 3 circle segments, 30°, 160 mm wide
- 7 circle segments, 60°, 80 mm wide
- 5 circle segments, 60°, 160 mm wide
- 12 straight lane segments, 80 mm wide
- 9 straight lane segments, 160 mm wide
- 3 point modules
- 1 compensation segment
- Wood screws

Watch a Pro at Work and Let Yourself Be Inspired!

You can watch Martin building the layout on NOCH's YouTube channel and pick up lots of suggestions there. In addition to a track plan and the necessary railway routes and supports, the kit also contains the Easy-Track 'Andrestal' Guidebook, which explains the basic idea and building principles of the Easy-Track system.

1. Everything you need for a quick start is included. Railway routes and supports in the right length

2. ...can be easily assembled according to the enclosed plan.

3. Finally, the tracks are laid. And then the landscaping can get underway!

4. Martin Tärnrot on 'Martinstadt'. The example of assembly shows how versatile the finished layout can be. Lots of custom ideas and wishes can be implemented according to your mood!

Info:
Marklin of Sweden

I was born in Stockholm, Sweden in 1970. My father had worked in the medical sector since the late '40s and often travelled to Germany on business. He sometimes brought H0-gauge trains with him, which was a very valuable toy for every child in Sweden back then. When I was seven years old, we began building my first model railway together.

The model railway has been a platform for friendship and learning throughout my life. I discovered the world of electronics in 1981. That was the catalyst for me to study electronic design; first analogue and later digital. Ten years later, I graduated from school as an electronic designer.

YouTube went online in 2005. I realised pretty quickly that someone who knew a bit more about model railways than

most was lacking there. Someone who knew how to set up the lighting and a camcorder properly and who could explain how to build a model railway in a simple and inspiring way. I chose this path and have been a full-time YouTuber for two years now, making how-to videos.

Creating instructional videos is not about 'knowing everything' or 'being the best'. It's about sowing inspiration that allows viewers to take their creations to the next level.

Martin Tärnrot a.k.a. 'Marklinofsweden'

NOCH Easy-Track – Finally Also for N Gauge!

N Easy-Track Railway Route Kit 'Mittelberg'

With the Easy-Track Kit 'Mittelberg', we are introducing a wonderful layout kit for N gauge. The varied route goes not only around the model railway landscape but also across it. A change of direction without a reverse loop makes the track plan exciting. A passing loop, a siding and the beautiful course of the route provide plenty of variety during operation. The layout can be operated analogue with two trains, which can alternate between doing their laps. In digital operation, the route network is large enough for two trains to do their laps simultaneously without disturbing each other.

Expected release: October 2022

Product Highlights:

- Easy-Track Railway Route Kit 'Mittelberg'
- 110 cm x 64 cm
- With track plans for Minitrix, Fleischmann with ballast bed (piccolo), Fleischmann without ballast bed

Made in Germany

N 53700 Easy-Track Railway Route Kit 'Mittelberg'

NEW

Outer dimensions of constructed routes:
110 cm x 64 cm, height 10 cm
Minimum floorspace required for assembly:
115 cm x 75 cm

Contents:

- 1:1 plot track plan
- Track plans for Minitrix, Fleischmann with ballast bed (piccolo), Fleischmann without ballast bed
- 21 pillars; maximum pillar height 9.6 cm, minimum pillar height 3.1 cm
- 5 circle segments, 24°
- 17 circle segments, 30°
- 5 straight lane segments
- 3 special lane segments
- 2 point segments
- Wood screws

In addition to the individual parts for constructing the Railway Route System, the kit also contains the Easy-Track Guidebook 'Andrestal', which explains how to build an Easy-Track Railway Route Kit by way of example.

A New Age Dawns in the Range

Perfect Sets

For many years, Ziterdes has been known for its ever-growing range of tabletop and dungeon games in the areas of historical, fantasy, steampunk, sci-fi and the end times.

We're expanding the selection to include the 'modern age' genre and now also offer countless pieces of furniture and tabletop accessories which can be used for games set between the last century and today. But that's not all! In addition to the many individual items, so-called "Perfect Sets" are available, too!

Our Perfect Sets are ideal for all those who don't want to spend a long time clicking through the range in order to equip their gaming table with inventory. We've put together thematically fitting sets with great attention to detail that won't just save you time searching but also money.

More Perfect Sets are planned. Stay tuned.

Expected release: June 2022

6079903 Perfect Set Office

28 mm – 32 mm

Contents: Safe, Desk with Computer and Swivel Chair
Chest of Drawers, Filing Cabinet

 Contents: Sink, Cooker, Refrigerator, Kitchen Cabinet
 Rubbish Bin, Kitchen Table with 4 Chairs

6079911 *Perfect Set Lounge* NEW
 28 mm – 32 mm
 Contents: Wall Unit with Tube Television, Round Iron Stove
 Coffee Table, Sofa, 2 x Armchair

6079912 *Perfect Set Bedroom* NEW
 28 mm – 32 mm
 Contents: Double Bed, Wardrobe, 2 x Bedside Table
 2 x Bedside Lamp, Book

Limited edition!

NEW Ge 4/4 III Advertising Locomotives

After two exclusive KATO RhB advertising locomotives (EMS and HCD) in N gauge appeared on the market at the end of 2021, we are excited to present another two limited edition advertising locomotives. Originally, the 'BÜGA' locomotive was baptised under the name 'Santa Maria Val Müstair' in 1994 after a small community in the canton of Graubünden. This locomotive runs with its own advertising for BÜGA (Bündner Generalabonnement or Graubünden General Season Ticket).

The Graubünden transport companies have joined forces under the BÜGA brand and jointly organise public transport in their canton. With the support of the Graubünden Department of Energy and Transport, innovation and successful cooperation are the top priorities. For passengers, BÜGA primarily means attractive travel offers and user-friendly season tickets.

Already available at your local dealer.

Sonja Bernhard
Brand Manager

I'm excited about these exclusive locos, which broaden the RhB series. They will sell out again very quickly.

Limited edition!

RhB locomotive #649, dubbed 'Lavin' (named after a small town in Graubünden), was also put into service in 1994. This locomotive carries advertising for Holcim (Schweiz) AG, one of the leading manufacturers of building materials in Switzerland and runs in the canton of Graubünden. Both advertising locomotives bring colour to your layout and complete

your Rhaetian Railway® collection! The locomotives are equipped with Arnold couplers but can be exchanged for the close couplers (NOCH ref. 7074046).

Already available at your local dealer.

Model Features:

- Minimum radius: R150
- Maximum incline: 5%
- Outer dimensions: approx. 103 mm x 19 mm x 26 mm
- Weight: approx. 79 g
- Wheel diameter: 6.8 mm
- Operating headlights
- Arnold couplers fitted (replacement coupling available: ref. 7074046)
- Digitisation with Digitrax decoder possible (ref. 70DN63K4A – Replacement Circuit Board)
- Can be combined with numerous RhB carriages, e.g. Glacier Express and EW I

Design Your Custom Railway Line!

Suitable accessories

Only with accessories and landscaping will your layout be unique and begin to come to life. KATO is generously equipped in the N-gauge area and, in addition to its trains and wagons, offers a multitude of accessories: bridges, platforms, buildings, engine sheds, but above all an infinite number of tracks and technical accessories.

7074937	23-131	Local Line Station Extension Set 124 mm, multi-part set incl. shelters, etc.	N

Let yourself be inspired and take some time out to browse our website, www.kato-unitrack.de.

Already available at your local dealer.

Highland Station European

This station will find a place anywhere that looks rural and where an idyllic landscape is to be created. The Highland Station can be integrated very easily into a hilly setting.

One-Sided Platform

The One-Sided Platform with steps is even more flexible for use in a small space. This platform is available with left and right ends and includes a timetable board and streetlamp.

Local Line Station Platform Kit

With this set, you can create a complete station that fits into any rural region and can also be used in small towns or suburbs. The Local Line Stations Platform Kit consists of several parts, which can simply and easily be stuck together.

Local Line Station Extension Set

Even in a village, a station offers in most cases an opportunity to wait for announced trains in a dry place. The Local Line Station Extension Set is just one of many platforms that KATO has in its range. It fits perfectly into a rural landscape.

The Rhaetian Railway® – On with the Journey!

NEW Ge 4/4 II 618 Bergün 'Rhaetian Railway'®

Ge 4/4 II electric locomotives are in operation in front of passenger and goods trains on the entire RhB main lines in Graubünden and named after towns along the route. Our new Rhaetian Railway® item with registration number 618 was baptised 'Bergün/Bravuogn', a double name in German and Romansh. The village of Bergün lies in the Albula Valley on the Albuna line. This red locomotive bears a large RhB logo in German script

on one side and Romansh on the other, as well as the municipality's coat of arms. It can be combined with all carriages from the Glacier Express, Bernina Express and even the standard carriage. The couplers are interchangeable, and digitisation is possible.

Expected release: Summer 2022

NEW Ge 4/4 II Untervaz – re-run

The Ge 4/4 II Untervaz #631 was introduced to the N-gauge market as a KATO model in 2018 and sold out very quickly. This locomotive, as well as all Ge 4/4 II locomotives, is most frequently used by the Rhaetian Railway® and can be seen on many railway lines. It can often be found as a prime mover for the Glacier Express on the Disentis – St Moritz route and for the Bernina Express, which runs between the towns of Chur and St Moritz. With its red and grey appearance, the 'Untervaz' conforms to the standard colour scheme of the RhB and thus fits perfectly into the KATO Rhaetian Railway® series.

Expected release: Summer 2022

Model Features:

- Minimum radius: R150
- Maximum incline: 5%
- Outer dimensions: approx. 93 mm x 19 mm x 24 mm
- Weight: approx. 79 g
- Wheel diameter: 6.8 mm
- Operating headlights
- Close couplers fitted (incl. replacement Arnold couplers)
- Digitisation with Digitrax decoder possible (ref. 70DN63K4A – Replacement Circuit Board)
- Power: 12 V direct current

Lots of Playing Fun Thanks to Numerous Accessories

N-gauge UNITRACK track system

With the N-gauge tracks from KATO UNITRACK, you have an infinite array of options for quickly and easily setting up your custom model railway line. The tracks in a scale of 1:160 are stable, of the best quality, and available both individually and in special starter and expansion sets. All sets can be combined with each other, are quick to unpack and repack, and can be stowed away in the storage box if there is not enough space. KATO offers an excellent N-gauge track system with a track bed speckled with grey (fine grain size) that is exactly to scale, extremely stable, and ideal for all N-gauge models. The bed consists of elastic plastic and is approx. 25 mm wide. The tracks can be easily connected together via connectors and snap into place with an audible 'click'.

Like the M1 Master Set, the Basic Oval Track Set (NOCH ref. 7078620), the M2 Master Set contains a wide array of rails and a KATO power pack with a plug-in adapter. In comparison to the M1, the M2 is more lavishly equipped. It's possible to install a siding or passing loop with the two points.

The numerous sets (V sets, listed in detail in our NOCH Main Catalogue and on the website www.kato-unitrack.de) are ideal for creatively expanding the train route with additional tracks, points, bridges, viaducts, etc.

Power Pack Standard SX

The Power Pack Standard SX is of course also available individually and is equipped with modern pulse width modulation technology to achieve finer motor control. The output power (1.2 A) has been increased, so as to guarantee an optimal direct current supply to the trains as well as a constant continuous light supply in the loco and wagons. Faults are quickly visualised by means of the red and green indicator LEDs on the device.

In this case, the plug-in Power Pack must be purchased separately according to the gauge: NOCH ref. 7078536 for N gauge or NOCH ref. 7078537 for H0 gauge.

You can find all the current UNITRACK items at www.kato-unitrack.de.

Rhaetian Railway® Freight Transport: Colourful and Diverse

NEW Rhaetian Railway® Freight Cars and Containers

In the summer of 2022, KATO will be launching numerous RhB freight and refrigerated wagons by Coop and the Swiss Post in various designs. The RhB's freight wagons cannot be overlooked as a rolling billboard on a rail network of 384 km throughout Graubünden. A goods wagon covers more than 100,000 km every year and is in use for up to 14 hours a day. The swap body system combines the usual swap body transport on the road with the advantages of rail transport. Depending on the type of swap body, with drinks, food, parcels, sensitive goods, collective consignments, building materials and much more.

The Coop cooperative based in Basel is one of the largest retail and wholesale companies in Switzerland. It was established in 1890 as the 'Verband Schweizerischer Konsumvereine' (Federation of Swiss Consumer Cooperatives, VSK), renamed 'Coop' in 1969, and has around 2.5 million members. Coop operates supermarkets, department stores, restaurants, home improvement stores and much more under its own name. Coop supplies the food distribution centres in Graubünden using RhB type Lb-v refrigerated wagons. Our models bear the Coop lettering, and each have a picture, e.g. a pineapple or potato.

With headquarters in Bern, the Swiss Post advertises with striking slogans on interchangeable containers in German, French and Italian. The Swiss

Post delivers the containers from the Weinfelden distribution centre via SBB (Swiss Federal Railways). In Landquart, the container is reloaded onto the RhB and transported daily to various regions in Graubünden. Incidentally, in 1857, the Swiss Post became the first long-standing customer of the Swiss Federal Railways, which started operations shortly before that in the 1850s.

KATO offers the two-axle Lb-v flat wagon and the four-axle Sb-t freight car individually, each without a container. Of course, these flat wagons can be used for any type of container. With an eight-piece set, which contains five Coop containers including wagons as well as three Swiss Post containers with wagons, KATO enables you to design realistic goods transport. All containers can be detached from the flat wagons. For expansion, Coop and Swiss Post containers are available in sets of two. **Expected release: Summer 2022**

Model Features:

- Minimum radius: R150
- Close couplers fitted (incl. replacement Arnold couplers)

Shorty Starter Set 0 Shinkansen KODAMA

The 0 series Shinkansen was the first multiple unit series built for high-speed routes. This series started service in 1964. The trains' maximum speed was 220 km/h. This made the trains the fastest railway vehicles in the world. Production of this series was discontinued in 1986. Due to the short lifespan (15 years) of these trains, only a few models from the 0 series are still in use. **Already available at your local dealer.**

Genesis GP38-2 Series Diesel Locomotive

By the early 1970s, many first-generation diesel locomotives had reached the end of their lifespan. The most common replacement locomotive was the GP38-2. EMD began producing the 16-cylinder, non-turbocharged, 2,000-horsepower engine in 1972. In contrast to the GP38's engine, which powered a generator to supply power to the traction motors, the GP38-2's prime mover used the alternator to generate alternating current, which was converted into direct current in order to power the four traction motors.

Another important change for the GP38-2 was the introduction of the modular 'Dash 2' electrical control cabinet. For more than 40 years, the GP38-2 has been performing its duties in goods transport on the main line, in local transport, for shunting work, as a standby locomotive and in snow removal. Many of them are still in use today.

Expected release: November 2022

Model Features:

- Fully equipped – just unpack and put on the track
- Equipped with McHenry couplers
- Minimum radius: 18"
- DCC-ready with Quick Plug™ technology

Still haven't found a suitable model from Athearn? No problem!

Your local dealer regularly receives updated stocks from us. So you can easily choose your model from this list, which your dealer then orders from us. This also applies to the US products from KATO.

Only while stocks last!

Open Day – 111 Years of NOCH

We're celebrating our 111th birthday this year.

That's reason enough to invite you to our factory in Wangen im Allgäu once again. During a short tour of the factory, you will witness how NOCH products are made. You can purchase NOCH products, remaining stock and discontinued items at a flea market and at NOCH Modellbauwelt. You'll have the opportunity to get to know many NOCH products and try them out for yourself at workshops and crafting demonstrations. Sustenance will of course also be provided.

Visit us on
27th and 28th May 2022

Throughout the Year with the Most Beautiful Pictures by NOCH!

Wall Calendar

We've compiled twelve of our most beautiful pictures for this calendar and printed them in large format on high-quality paper. Fitting motifs for the respective month inspire you to get crafting and building with NOCH products.

The calendar pages are each labelled with the names of the months in German, English, French, Spanish and Dutch. The individual months are numbered consecutively with the dates, but without the days of the week. This means you can use the calendar anew every year.

February has 28 days.

The calendar is an ideal gift for model railway and landscaping fans.

Already available at your local dealer.
