

ATLAS MASTER® N SD60E LOCOMOTIVE

Ordering: <http://shop.atlasrr.com/d-424-jan-2018-n-scale-pre-orders.aspx>

Information: <https://shop.atlasrr.com/c-615-n108.aspx>

FEATURES:

- Blackened metal wheels
- Scale Speed™ motor
- AccuMate® magnetic knuckle couplers
- Golden-White LEDs
- Operating front and rear ditch lights
- K5Lar24 horn part
- PTC Antenna Array
- Measured from actual SD60E
- Admiral cab

DCC OPERATION FEATURES (GOLD LOCOMOTIVES ONLY)

- Supports all DCC-programming modes
- DCC includes RailCom and RailComPlus, with 14, 28 or 128 speed steps and with 2-digit and 4-digit addressing.
- Flexible mapping of function keys F0 to F28.
- A total of 6 DCC function outputs are available, and all can be function mapped (disable, brightness, light effects) individually
- Follows all NMRA DCC standards and recommended practices.

SOUND FUNCTIONALITY FEATURES (GOLD LOCOMOTIVES ONLY):

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more. There are up to 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals. Equipped with ESU's Exclusive "Full Throttle" features for ultimate realism in prototype running.

AccuMate® couplers are made under license from AccuRail, Inc.

Norfolk Southern

Norfolk Southern "Honoring First Responders" 911

ATLAS MASTER® N SD60E LOCOMOTIVE

In the late 2000's, Norfolk Southern looked for ways to increase the life of their SD60 fleet. One factor NS had for them was their venerable Juniata Locomotive Shop in Altoona, Pa, which has the ability and a proven history of rebuilding just about any type of locomotive. Enter the "SD60E", which would take SD60 cores (The first 240 planned would be from standard cab SD60's, which was a mixture of NS and former lease locomotives) and add a new cab designed by NS, which was called a "Crescent Cab". The locomotive received upgrades to the motor, fuel tank (On earlier rebuilds), and microprocessor controls to name a few. The first SD60E rolled out in 2010 as number 6900, which was rebuilt from NS 6653. Soon, more would follow and the current totals are at 136 rebuilt so far (NS 6900-7035). More rebuilds are planned into 2019 and eventually their SD60M and SD60I fleet will be rebuilt. What makes the SD60E even more unique from their browed cabs, is that three locomotives wear commemorative schemes honoring, Veterans, First Responders, and the "GORAIL" project. Atlas' representation captures every detail, right down to the PTC Antenna Array on top of the cab roof.

The photographs on these pages were taken by Atlas' own Bobby Allard, during a Research and Development trip to the Juniata Locomotive Shop. While there, Bobby not only took photos, but he was able to measure and carefully inspect these locomotives and their many details, adding to the authenticity of Atlas' models.

Bangor & Aroostook

Belt Railway of Chicago

FEATURES:

- Optional 800 gallon or 1,600 gallon fuel tank
- Fine scale handrails and stanchions
- Golden-white LEDs
- Painted hand rails
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Directional lighting
- Factory-equipped with AccuMate® knuckle couplers
- Separately-applied wire grab irons
- MU hoses and coupler cut bars
- Two painted crew members
- NMRA 21 pin plug for DCC

DCC Operation Features:

- Supports all DCC-programming modes
- Flexible mapping of function keys F0 to F28.
- A total of six DCC function outputs are available
- Follows all NMRA DCC standards and recommended practices.

Analog (DC) Operation Features:

- The LokSound Select Dual-Mode decoder allows your Atlas Gold Series locomotive to be used on DC as well as on DCC layouts.
- Please note that the Atlas Quantum Engineer will NOT operate an Atlas Gold Series locomotive equipped with a LokSound Select decoder on an analog (DC) layout. However, the sound and lighting functions of the LokSound Select decoder in the Atlas Gold Series locomotive can be controlled by an easy-to-use basic DCC system
- Also note that on a DC-powered layout, a DCC and sound equipped locomotive CANNOT be consisted with another locomotive that does not also have both DCC and sound. (This statement does NOT apply to DCC-equipped locomotives operating on a DCC layout.)

Sound Functionality Features:

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.
- There are 16 user-selectable horns, 2 user-selectable bells, and 2 user selectable synchronized brake squeals.
- Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.
