

Ponds, Pools and Puddles ...

Artificial Water mini

Sometimes it must be done quickly and you want to create only a small water body. The Artificial Water mini is ideal for modelling a pond in the garden or in a forest, a small puddle or a swimming pool. Just pour the 1-component-material into the prepared water bed. Then just wait until it is dry and hard, and your mini water is ready!

Processing: Pour in a maximally 2 to 3 mm high water layer. It will take approx. 12 hours to harden. Thereby the artificial water will lose roughly 50 % of its volume, as the material is based on real water.

Find more information on www.noch.com

Expected release: October 2018

60876 Artificial Water mini
125 ml
ready-to-pour in the bottle

Info-Tip:

Artificial Water is also available in a 250 ml bottle (ref. 60873) and as an economy XL bottle of 500 ml (ref. 60874).

Being Organized Makes Life Even Easier!

Green Christmas!

Illuminated Christmas Tree

The Christmas Tree is the star of any Christmas celebration. Whether it's a small tree in the living room or a large tree in the middle of the market square at a Christmas market, the Christmas spirit is awakened as soon as the lights come on. The NOCH Christmas Trees are equipped with warm white LEDs, which radiate pleasantly warm light, similar to a string of fairy lights with lightbulbs.
