

GAUGEMASTER

GM330 White Van Man Starter Set

The innovation of the Faller Car System has arrived in the Gaugemaster range. We have teamed up with Faller to bring the Car System to the UK Market. This set gives you everything you need to get up and running in the world of moving vehicles.

Included in the set is an Undecorated Mercedes-Benz Sprinter Van, a decal sheet allowing you to convert the van into a number of liveries, a charger for the vehicle, road filler, wire, roadway paint and road markings, as well as a number of barriers for use along your roads. Of course, if you are after additional items, the set is compatible with the rest of the standard Faller Car-System so any components from that range can be integrated. For details of the range, visit www.gaugemaster.com/faller

GAUGEMASTER

Highways

The Gaugemaster Highways range allows you to build realistic HO/OO and N Scale roads on your layout, using our self-adhesive roadway. The roadway can be cut with scissors, and simply stuck down in the desired place. Vehicle lighting kits and roadside barriers are also available, as well as our British Faller Car System Starter Set.

www.gaugemaster.com

Vehicle Lighting Kits

Add another dimension to your models with these lighting kits. There are three kits in the range, allowing modellers to light standard vehicles, emergency vehicles and service vehicles. The GM385 allows the front and rear lights to be wired up and illuminated on any vehicle. The GM386 also includes 2 blue LEDs for use with emergency vehicles, and the GM387 has 2 orange LEDs for use with construction and maintenance vehicles.

Adding these units to your models can dramatically enhance the scenes. No longer will your vehicles all appear to be driving round with no lights on. For the adventurous modeller, why not try using the service vehicle kit to simulate flashing indicators on your cars and other vehicles.

These units have other uses too, in reality, the sky's the limit when it comes to their uses. They could also be used to simulate warning lights on top of buildings to illuminate signs, or why not add these to model boats for transformer free lighting.

Included in each pack are the required LEDs a battery box, a CR2032 battery, a processor unit, and a 1.2mm drill bit for easy installation. additional LEDs these are available in our Electrics Range

GM385 Vehicle Lighting Kit OO Scale

GM386 Emergency Vehicle Lighting Kit OO Scale

GM387 Service Vehicle Lighting Kit OO Scale

GM61 4 Additional Micro LEDs - White

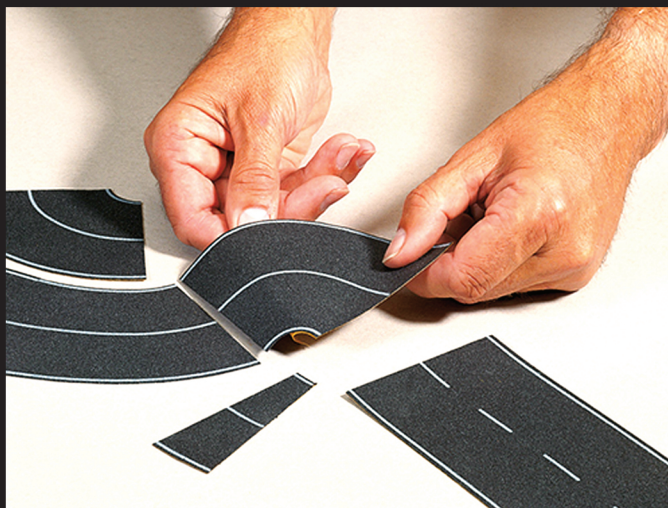

GM62 4 Additional Micro LEDs - Red

GM63 4 Additional Micro LEDs - Blue

GM64 4 Additional Micro LEDs - Orange

Self Adhesive Roadway

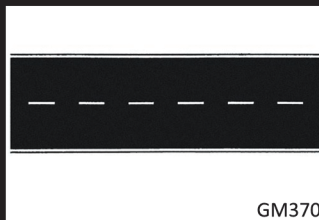

All roads lead here. With our range of road sections creating a realistic road network is simple and easy. The roadway is made of a stretchable crepe and is self adhesive allowing it to be quickly applied.

The roadway is supplied in two formats, the straight road rolls and universal curves. Any curve can be created using the Universal Curves. Simply cut out the radii of curve you require, and attach it between two lengths of the straight sections as shown in the image above.

This roadway is also a perfect finish for your Car System roads. This can be applied over the embedded wire for a clean, flat, and smooth finish for your cars to run over.

Our roadway is fully compatible with the Noch roadway. This means that you can mix and match these sections with the Noch roads, paths, car-parks and junctions too.

GM371

GM370 Self Adhesive Tarmac Road OO Scale (1m x 80mm)

GM371 Self Adhesive Tarmac Road Universal Curves OO (80mm) 2pcs

GM375 Self Adhesive Tarmac Road OO Scale (1m x 68mm)

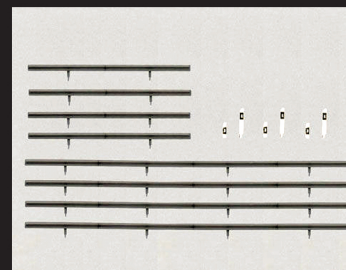

GM376 Self Adhesive Tarmac Road Universal Curves OO (68mm) 2pcs

GM390 Self Adhesive Tarmac Road N Scale (1m x 40mm)

GM391 Self Adhesive Tarmac Road Universal Curves N (40mm) 2pcs

Roadside Crash Barriers

These crash barriers are ready to be placed at the road side. They are moulded in grey plastic so can simply be added directly to your model, or painted if required. The pack includes 1m of barriers which are flexible enough to be used on straight sections, or moulded round bends. The pack also includes delineator posts.
