# Plastruct 

INTERNATIONAL SUPPLIER OF ARCHITECTURAL, EDUCATIONAL AND HOBBY MODEL PARTS

## WELCOME TO PLASTRUCT

Dear Customer:
This New PLASTRUCT Catalog contains the world's finest and most comprehensive selection of scratchbuilding hobby model parts. We are proud to offer over 4500 model products in this New, Volume 10 Universal Catalog directed specifically to the scratch modeling enthusiast.

If this is your first exposure to PLASTRUCT, we are confident you will find many products of interest. If you are already familiar with PLASTRUCT, thanks for your continued support. We know you will appreciate our improved graphics and product specifications, and the inclusion of metric dimensions for our international friends.

To obtain PLASTRUCT products, first see your local Hobby Dealer. If they cannot help you, use the handy Mail Order Form included with this Catalog or visit our online store at www.plastruct.com. You can also contact the PLASTRUCT Representative in your country listed on our website at www.plastruct.com.

Good Luck on your modeling projects.

## THE HISTORY OF PLASTRUCT

PLASTRUCT was established in 1968 to serve the consumer hobbyist through mail order and retail stores. Beginning as a one man, 500 sq. ft. operation, PLASTRUCT grew into an international company with over 50 employees and corporate offices, warehouses and production facilities now totalling $30,000 \mathrm{sq}$. ft .
PLASTRUCT's original products were conveniently displayed in a colorful, rotating, counter-top display. The first 16-page PLASTRUCT Catalog contained approximately 250 products consisting of Gray ABS Structural Shapes and White Butyrate Tubing with some basic Fittings.

PLASTRUCT grew slowly but steadily during the first 20 years, adding a few new products or model railroading scratchbuilding Kits with each new Catalog printing. While PLASTRUCT's product range increased moderately, PLASTRUCT's worldwide expansion moved rapidly with nearly 5000 Displays worldwide and foreign subsidiary offices on four different continents.

PLASTRUCT's customer base also grew to include Architectural model builders, Graphic Artists, Miniaturists and Doll House enthusiasts, Special Effects companies, Schools and Educators. In 1985, PLASTRUCT merged with a sister company specializing in architectural model parts, which caused PLASTRUCT's product range to increase to more than 2000 different products.

With the addition of PLASTRUCT's FineLine White Styrene Structural Shapes, Sheet and Tubing, and the Design Technology (D\&T) Educational product line in 1990, PLASTRUCT now manufactures and distributes over 4500 versatile products, directed toward every facet of model building and design. PLASTRUCT provides quality service and products to Architects, Art Designers, Craftsmen, Educators, Engineers, Graphic Artists, Industrial Designers, Kit-Bashers, Military Modelers, Miniaturists, Model Railroaders and Scratchbuilders of all types. PLASTRUCT parts can be used for modelbuilding in scales ranging from very small $(1: 1200)$ to quite large $(1: 12)$ by professionals and hobbyists alike.
PLASTRUCT scratchbuilding products cover every part of a model, from foundation to landscaping to finishing. Presented in colorful, space-saving, sturdy, point-of-purchase floor and counter-top Displays, PLASTRUCT's well recognized rotating merchandisers are now located in 7500 Hobby, Graphic Art, Book, Craft, and other retail stores worldwide.

PLASTRUCT is also available by mail order from several different sources, including factory direct when necessary, and now offers its full range catalog online with easy ordering.

PLASTRUCT utilizes three major manufacturing processes. In-house facilities include five injection molding presses, five extrusion lines, one sheet line, one wire coating line and one vacuum former. The most accurate and quality efficient methods of production and the most suitable raw materials have been selected. For customer convenience, this fully illustrated PLASTRUCT Catalog lists the manufacturing process and material for each product.

## PLASTRUCT PLASTICS

## The most commonly used plastic materials are:

1. ABS - known for its strength, durability and workability.
2. BUTYRATE - pliable, machinable and durable.
3. STYRENE - compatible, strong and workable.
4. ACRYLIC - rigid, strong and generally brittle.
5. COPOLYESTER - pliable, stress resistant and durable.

Plastic has been used whenever possible because it is easier and faster to work with than wood, metal or cardboard. Plastic can be sawed, blade cut, drilled, lathe-turned, carved, sanded and filled. Most standard woodworking tools may be used on plastic and it will not splinter. Plastic parts join in seconds with small amounts of liquid solvent cement. For bonding plastic sheet materials to foam, wood or Masonite, Contact Cement can be used. For large sheet stock, many professionals prefer to use counter sunk screws for attachment. A spray adhesive is sometimes easier for small jobs.

ABS
ABS has been hailed by professional modelmakers as "the best all-around construction material since wood". Stronger and more rigid than many metals; easier and more flexible to work with than any previous plastic; cleaner and more durable than wood, ABS structural shapes by PLASTRUCT have been used for engineering design models on an international scale since their introduction. ABS is also one of the best plastics for heat or vacuum forming and, of course, has excellent bonding characteristics, not only to itself but to other commonly used plastics.
PLASTRUCT Traditional Structural Shapes are all carefully molded and extruded to extremely close tolerance and in the colors to best represent the materials being simulated. The plastic we have selected (an ABS formulation) best meets our specifications for stability with just the desired amount of flexibility to minimize shock.
ABS is a thermoplastic terpolymer combining the best qualities of the Acrylics, Butyrates, and Styrenes. It is more than half again as rigid as its cousin, Styrene, and size for size, is nearly as rigid as brass. Extremely resistant to most acids and alkalies, the ABS lustrous surface is unaffected by most chemicals, even lacquer - a property unheard of in the early plastics.
Unlike wood and brass, PLASTRUCT ABS Traditional Structural Shapes require no priming, sanding, or sealing to enhance its hard finish. But like even the most primitive plastics, ABS bonds easily, quickly, and with a minimum of fuss.

## BUTYRATE

The material used in our Traditional Round Tubing medium is Butyrate plastic. It has proven to be ideal because it is so convenient to work with. It can be cut, turned, drilled, painted and easily cemented. The Tubing and Tubing Fittings are manufactured to provide a good friction fit and maintain the outside diameter; splines on the male Fittings accomplish tight fit and prevent undesired rotation and still allow intentional turning. This feature permits cementing to be a final operation. The telescoping sizes of the pipe combined with the workability makes improvisation quite simple.
Butyrate can be lathe-turned in the same manner as brass or Cast Acrylic. Grind the cutting tool to provide chip clearance. The resultant turnings will have a polished surface. This material can also be drilled, tapped, carved or saw cut. Very slow speed is required for machine sanding.
Fittings can be more readily attached to Tubing, particularly in sizes $5 / 16^{\prime \prime}$ and over, if the pipe is screwed onto the Fitting. Always rotate the Tubing in the same direction whether attaching or removing the Fitting.

## STYRENE

Styrene (also known as Hi-Impact PolyStyrene) is the most commonly used plastic in molded plastic kits (Model Railroad, Automobile, Airplane and Ship). For that reason, we have chosen Styrene as the medium in our New FineLine Structural model parts for compatability in kit-bashing. It may be combined with wood, metal and other plastics using special glues or cements. Styrene has a tendency to be brittle, especially after lengthy U.V. exposure or painting. It is easily warped by solvents, so care must be taken when cementing flat sheets for walls, and reinforcement bracing is recommended. When constructing closed tanks or structures, venting is recommended to allow the inside and outside temperatures to equalize. Styrene has excellent forming characteristics and bonds rapidly and permanently. Styrene plastic cuts easily using the "scribe and break" method. Only use Enamel, Alkyd Oil, Latex or Acrylic paints specified for Styrene plastics.

## ACRYLIC

Acrylic is the most rigid and brittle of these plastics. Acrylic is processed in three methods; cast, extruded and molded. It is usually warp-free. When used for model making, Acrylic is usually used in tubing and thick sheet form, cubes and balls, and round, square and triangular rod. Acrylic accepts most paints, including lacquer.

## COPOLYESTER

Copolyester (also known as P.E.T.G.) is tougher and less prone to split or shatter than Acrylic. It has excellent clarity in sheet form, and is resistant to stress whitening. It is easily formable and not prone to warp. Copolyester is quite stable and bonds well to itself, however with most other plastics, a special industrial grade Cyanoacrylate Glue is recommended. Accepts most paints, including lacquer.

## WORKING WITH PLASTRUCT

## PAINTING

While certain types of paint adhere better than others on various types of plastic, almost any type of paint may be used. Alkyd oils are probably the best all around paints and are available in flat or satin finishes. Use Floquil brushable paints for painting basswood. The pigment in this paint is specially ground to provide good coverage without hiding detail. Latex paints are only suitable when the surface offers some mechanical bond (matte finish). Water colors and poster paints are not recommended. Lacquers are ideal for ABS and Butyrate but are not compatible with Styrene. Minwax stain is excellent for Basswood. Be sure to pre-stain all parts before gluing as the glue seals the wood and prevents the stain from penetrating.

## HEAT FORMING

Heat forming, shaping and bending plastics can be done easily in as simple a device as a kitchen oven, provided that the upper heat range can be controlled. The most widely used plastic sheet materials for forming are ABS, Butyrate and Styrene. A new material which also has excellent forming properties is Copolyester plastic sheet. The best temperature to work with these materials is approximately $200^{\circ}-250^{\circ} \mathrm{F}\left(120^{\circ} \mathrm{C}\right)$, and, unless you actually want to melt the material to a near liquid, don't exceed about $400^{\circ} \mathrm{F}\left(205^{\circ} \mathrm{C}\right)$ under any circumstances.

## TOOLS

Possibly the single most useful tool for most model builders is a hobby knife (X-Acto style) with a \#11 blade. Add to this a heavy steel rule or straight edge, a triangle or square, hobby saw, an assortment of small files, a mitre box, tweezers or hemostats, a sheet plastic cutting tool, dividers, hand drills, pin vise and bits and you have the contents of a basic toolbox. For most projects, small table top power equipment can be used for a more professional approach and quicker completion. These might include a disc sander, circular saw, drill press, belt sander, a mini drill and bit assortment, and possibly a lathe. Care should be taken when cutting, drilling or machining plastic material to avoid excessive speed or pressure by the tool to the materials, as melting and gumming will result.

## PLASTIC WELD CEMENT

Instantly tacky. Sets in minutes - bonds permanently overnight. Economical to use. Special formulation dissolves a thin layer of each surface to be joined. It evaporates quickly and forms a welded joint; one as strong as the surrounding plastic. Apply with a small brush or blunted syringe-type applicator. Capillary action will spread it the length and breadth of the joint for a continuous solid weld. Plastic Weld works on most dissimilar Styrene, Butryrate, ABS and Acrylic applications.

## BONDENE CEMENT

Bonds instantly. Sets in seconds - bonds permanently in minutes. Economical to use. Special formulation dissolves a thin layer of each surface to be joined. It evaporates quickly and forms a welded joint; one as strong as the surrounding plastic. Apply with a small brush or blunted syringe-type applicator. Capillary action will spread it the length and breadth of the joint for a continuous solid weld. Bondene works on all "alike" Styrene, Butyrate, ABS, Acrylic and Copolyester applications.

## CEMENT GUIDE

For the various materials found in this Catalog, the following cements are recommended:

## Styrene

Similar plastics - BOND-2 and PPC-2
Dissimilar plastics - PPC-2, EPX and CYC
Acrylic sheet, wood \& foam - Contact Cement, EPX and CYC
Acrylic
Similar plastics - BOND-2, PPC-2 and WOC-3
Dissimilar plastics - PPC-2 and CYC
Acrylic sheet, wood \& foam - Contact Cement, EPX and CYC

## ABS

Similar plastics - BOND-2 and PPC-2
Dissimilar plastics - PPC-2 and CYC
Acrylic sheet, wood \& foam - Contact Cement, EPX and CYC

## Butyrate

Similar plastics - BOND-2 and PPC-2
Dissimilar plastics - PPC-2 and CYC
Acrylic sheet, wood \& foam - Contact Cement and CYC

## Copolyester

Similar plastics - BOND-2 and PPC-2
Dissimilar plastics - CYC-10
Acrylic sheet, wood \& foam - CYC-10 and Contact Cement

## Urethane Foam (Foam)

Foam - Hot Glue or Contact Cement
All others - Contact Cement
Expanded Polystyrene Foam (Foam)
Foam - Spray Adhesive and White Glue
All others - Spray Adhesive, White Glue and Contact Cement

## Basswood and Balsawood

Wood - Aliphatic Resin
Paper - White Glue
All others - Contact Cement

## TRADITIONAL ABS ANGLES

Use for bracing in the construction of heavy steel structures, and vertical support legs in light structures. Precision Injection Molded in Dark Gray ABS Plastic. Ideal for all outdoor or professional model construction where model life is critical. High impact characteristics provide durability, flexibility and longevity of the model.

## FINELINE STYRENE DEEP CHANNELS

Use for bracing or medium weight horizontal and vertical support members in the construction of most steel structures. Precision Extruded in White Styrene Plastic. Ideal for museum quality and smaller scale model construction where assembly speed, profile accuracy and cost are the determining factors.

| CODE | ACTUAL SIZE |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 'H' |  | 'W' |  | 'T' |  | LENGTH |  |
| UFS-2 | 1/16" | 1.6 mm | . 043 | 1.1 mm | . 015 | 0.4 mm | 10" | 250 mm |
| UFS-3 | 3/32" | 2.4 mm | . 065 | 1.7 mm | . 025 | 0.6 mm | 10" | 250 mm |
| UFS-4 | 1/8" | 3.2 mm | . 089 | 2.3 mm | . 030 | 0.8 mm | 15 " | 375 mm |
| UFS-6 | 3/16" | 4.8 mm | . 135 | 3.4 mm | . 030 | 0.8 mm | 15 " | 375 mm |
| UFS-8 | $1 / 4{ }^{\prime \prime}$ | 6.4 mm | . 180 | 4.6 mm | . 040 | 1.0 mm | 24 " | 600 mm |

For fast, clean, accurate cutting of Styrene Shapes, Tubing, Strip and Rod, simply scribe with a hobby knife and snap. When cutting Sheet Styrene, make all scribes first and then bend downward one side at a time until it snaps clean.

## TRADITIONAL ABS I-BEAMS

Use for horizontal or diagonal members in the construction of most steel structures. Precision Injection Molded in Dark Gray ABS Plastic. Ideal for all outdoor or professional model construction where model life is critical. High impact characteristics provide durability, flexibility and longevity of the model.

| CODE | ACTUAL SIZE |  |  |  |  |  |  |  |

## TRADITIONAL ABS H-COLUMNS

Use for vertical or diagonal members in the construction of most steel structures. Precision Injection Molded in Dark Gray ABS Plastic. Ideal for all outdoor or professional model construction where model life is critical. High impact characteristics provide durability, flexibility and longevity of the model.

## ABS LARGE STRUCTURAL ASSEMBLIES

A quick and simple method for assembly of LARGE structural I-Beams and H-Columns using the components below. Flange includes a $1 / 8^{\prime \prime}(3.2 \mathrm{~mm})$ wide by $1 / 16^{\prime \prime}(1.6 \mathrm{~mm})$ deep slot providing a snug fit for the Web. For best results, assemble parts dry before applying cement. Using a sloping V-block jig will help ensure $90^{\circ}$ angles and allow rapid and complete solvent bonding by capillary action.
When determining the correct components, be sure to subtract $1 / 8^{\prime \prime}(3.2 \mathrm{~mm})$ from the required Web dimension. Example: $3 / 4$ " ( 19.1 mm ) W x 2 " ( $50 . .8 \mathrm{~mm}$ ) H Finished Size = two SAF-24 plus one SAW-60.

## ABS STRUCTURAL WEBS

Use for custom fabrication of structural I-Beams and H-Columns. Precision Extruded in Dark Gray ABS Plastic. Ideal for all large scale and outdoor model construction where strength and size is critical. High impact characteristics provide durability, flexibility and longevity of the model.

| CODE | ACTUAL SIZE |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 'W' |  | 'T' |  |
| SAW-24L | $3 / 4$ " | 19.1 mm | $1 / 8{ }^{\prime \prime}$ | 3.2 mm |
| SAW-28L | 7/8" | 22.2 mm | 1/8" | 3.2 mm |
| SAW-32L | 1" | 25.4 mm | 1/8" | 3.2 mm |
| SAW-36L | 1-1/8" | 28.6 mm | 1/8" | 3.2 mm |
| SAW-40L | 1-1/4" | 31.8 mm | $1 / 8$ " | 3.2 mm |
| SAW-44L | 1-3/8" | 34.9 mm | 1/8" | 3.2 mm |
| SAW-48L | 1-1/2" | 38.1 mm | $1 / 8{ }^{\prime \prime}$ | 3.2 mm |
| SAW-52L | 1-5/8" | 41.3 mm | 1/8" | 3.2 mm |
| SAW-56L | 1-3/4" | 44.4 mm | $1 / 8{ }^{\prime \prime}$ | 3.2 mm |
| SAW-60L | 1-7/8" | 47.6 mm | 1/8" | 3.2 mm |
| SAW-64L | 2 " | 50.8 mm | 1/8" | 3.2 mm |

NOTE: $\quad 30^{\prime \prime}(750 \mathrm{~mm})$ Length.

## ABS STRUCTURAL FLANGES

Use for custom fabrication of structural I-Beams and H-Columns. Precision Injection Molded in Dark Gray ABS Plastic. Ideal for all large scale and outdoor model construction where strength and size is critical. High impact characteristics provide durability,
 flexibility and longevity of the model. Slot is $1 / 16^{\prime \prime}(1.6 \mathrm{~mm})$ deep.

| CODE | ACTUAL SIZE |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

HAND RAILS

Use for hand rails on platforms, walkways, balconies and any other elevated structures with public access. Precision Injection Molded in Gray ABS or White Styrene Plastic (as noted). Ideal for all outdoor or professional model construction where model life is critical. High impact characteristics provide durability, flexibility and longevity of the model.

## 1:16 HANDRAIL STANCHIONS

Independent hand rail stanchions for circular and non-standard or angled applications. Trimming one or two horizontal junctions allows use in other scales. Designed for use with our MIW-1 or TB-1. $3 / 32^{\prime \prime}(2.4 \mathrm{~mm})$ O.D. Precision Injection Molded in White ABS Plastic. Sold in bags of 10 pcs . ONLY.

## STAIRWAYS

Use for open stairways commonly found in industrial complexes, high-rise fire stairs, parking structures, tanks, platforms and other unfinished or open structures. Precision Injection Molded in Gray ABS or White Styrene Plastic (as noted). Ideal for all outdoor or professional model construction where model life is critical.

ABS hand rails and stair rails may be curved to fit circular applications by softening them in warm water or heating with a hair dryer. Stairs may be modified to fit the circumference of a tank or other curved surface by cutting off the stair stringer from the side to be cemented. Tape the stair in place. Attach each stair step separately.

## CUSTOM STAIRCASES

Use in interior applications where a closed casing or spiral stair case is desired. The straight, right and left sets may be combined to achieve any configuration. Precision Injection Molded in Styrene Plastic. ASSEMBLY REQUIRED.

## STEPS \& LOUVRES

Use for steps found in front of commercial or civic buildings where wide or dramatic entrances are common. Two different grades (slopes), $17^{\circ}$ and $34^{\circ}$, allow for variety and realism. May also be used for window louvres in larger scale applications. Precision Injection Molded or Vacuum Formed in White Styrene Plastic.

Even better, purchase a few serving trays (cafeteria style) and cut the polypropylene sheet to snugly fit inside. This way, the sides will capture any spilled solvent cement before it spoils furniture, and you can use different trays for different in-progress projects.

## SAFETY CAGE AND LADDER SET

Use on towers, tanks, buildings and other tall structures where a ladder is perpindicular (or $90^{\circ}$ ) to the ground. Precision Injection Molded in Gray ABS or White Styrene. Ideal for all outdoor or professional model construction where model life is critical. High impact characteristics provide durability, flexibility and longevity of the model.

## STRUCTURAL FITTINGS

Use for securing Ladders against structures and other towers. Designed for adjustable clearance from the mounting surface by simply trimming the stem length. Use SX as mounting device or drill $1 / 16^{\prime \prime}$ hole ( 1.6 mm ) Precision Injection Molded in Clear Acrylic Plastic.

|  | TO FIT | SX | STEM |  |
| :--- | :---: | :---: | :---: | :---: |
| CODE | LADDER | SIZE | O.D. |  |
| LC-8 | 8 | SX-2 | $1 / 16^{\prime \prime}$ | 1.6 mm |
| LC-12 | 12 | SX-3 | $3 / 32^{\prime \prime}$ | $2.4_{m m}$ |
| LC-16 | 16 | SX-3 | $3 / 32^{\prime \prime}$ | $2.4_{m m}$ |
| LC-24 | 24 | SX-3 | $3 / 32^{\prime \prime}$ | $2.4 m \mathrm{~mm}$ |

## ABS COLUMN BASE MOUNTS / COLUMN BLOCKS

Use to quickly and effectively mount vertical columns (codes $\mathrm{H}-4$ through $\mathrm{H}-24$ ) to your model base. Precision Injection Molded in Dark Gray ABS Plastic.

|  | TO FIT |
| :--- | :---: |
| CODE | COLUMN |
| BM-4 | 4 |
| BM-6 | 6 |
| BM-8 | 8 |
| BM-10 | 10 |
| BM-12 | $12 \& 14$ |
| BM-16 | $16 \& 18$ |
| BM-20 | $20 \& 24$ |

Use to quickly and effectively mount vertical square tubing (codes ST-12 through ST-24) to your model base. Also used for concrete blocks, lamp bases, etc. Precision Injection Molded in Light Gray ABS Plastic.

| CODE | ACTUAL SIZE |  |  |  | $\begin{aligned} & \text { TO FIT } \\ & \text { TUBE } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |

## CONSTRUCTION STUDY FITTINGS \& KITS

The Construction Study System and Fittings allows designers to facilitate the structural arrangement and layout of equipment and structures in preliminary form and educators to demonstrate structure design and strength in three dimensions. This quick and easy to use, and re-use, system provides complete flexibility and is presented solely as a design tool - a method of thinking and expressing in three dimensions. All parts are precision Injection Molded in Dark Gray ABS Plastic.
The components are designed to work only with our $\mathrm{H}-12$ and $\mathrm{B}-10$ structural members.
Available both in Kit form or by individual products. Kits include a selection of the below components as well as scale figures and other definitive scale parts to construct the diagram below.

|  |  |  |
| :--- | :--- | :--- |
| CODE | SCALE |  |
| KIT-5029 | $1 / 4^{\prime \prime}=1^{\prime}-0^{\prime \prime}$ | $1: 48$ |
| KIT-5030 | $3 / 8^{\prime \prime}=1^{\prime}-0^{\prime \prime}$ | $1: 32$ |
| KIT-5031 | $1 / 2^{\prime \prime}=1^{\prime}-0^{\prime \prime}$ | $1: 24$ |
| KIT-5032 | $3 / 4^{\prime \prime}=1^{\prime}-0^{\prime \prime}$ | $1: 16$ |

Column Footer CODE: PCF-12
Provides a firm support for H-12. May be temporarily positioned with double stick tape. Use PW-12 for secure fit.

Column Cross CODE: PCC-12

Provides a quick and easy way to attach B-10 cross members to $\mathrm{H}-12$ columns. Use PW-12 for secure fit.

Beam Cross
CODE: PBC-10
Snaps over primary B-10 members to allow easy installation of secondary B-10 members.

Beam Support
CODE: PBS-10
Snaps over primary B-10 members to allow easy installation of secondary B-10 members.

Column Splice CODE: PCJ-12

Provides a quick and easy way to attach two H12 columns together.
Use PW-12 for secure fit.

Beam Splice CODE: PBJ-10

Provides a firm support for joining two B-10 members together.

Column Wedge CODE: PW-12

Acts as a locking wedge for securing the Column Footer, Column Cross or Column Splice to the column.

Ladder Support
CODE: PLS-10
Provides a firm support for a ladder or stair by snaping over a B-10 member.

## TRADITIONAL BUTYRATE ROUND TUBING

Use for piping in industrial, residential, commercial and many other model settings. May also be used as round pylons in bridge, pier and other structures. Precision Extruded in White Butyrate Plastic. Ideal for all facets of model building. See related piping fittings later in this Catalog.

NOTES: $15^{\prime \prime}$ ( 375 mm ) Length.
All White Butyrate Tubing is also available at double the shown length for twice the listed price. Just add ' L ' to the end of the Product Code. Example: TB-12L TB-1 and TB-2 are Butyrate coated wire.

## FINELINE STYRENE ROUND TUBING

Use for piping in industrial complexes or for flatcar loads. May also be used as round pylons in bridge, pier and other structures. Precision Extruded in White Styrene Plastic. Ideal for museum quality and smaller scale model construction where assembly speed, profile accuracy and cost are the determining factor.
For smaller diameter rounds, see following pages.

## TRADITIONAL ABS ROUND TUBING

Use for "cracking towers", storage tanks, silos and other tanks found in chemical, industrial and municipal facilities. Precision Extruded in Gray ABS Plastic. Ideal for all outdoor or professional model construction where model life is critical. High impact strength provides durability, flexibility and longevity of the model.
See related fittings later in this Catalog.

NOTES: $18 "(450 \mathrm{~mm})$ Length.
All Gray ABS Tubing is also available at double the shown length for twice the listed price. Just add 'L' to the end of the Product Code. Example: TB-200L

## DARK GRAY ABS TUBING

Use for piping in industrial model settings. May also be used as round pylons in bridge, pier and other structures. Precision Extruded in Dark Gray ABS Plastic. Ideal for all facets of model building. The color matches our Traditional ABS Structural Shapes.

## NOTE: 30 " ( 750 mm ) Length.

 guide. Tighten the clamp around the tube, and using a hobby knife, lightly scribe lines every 8 scale feet around the tank. Scribe vertical lines using a straight edge.
## CLEAR ACRYLIC ROUND TUBING

Use in craft or home decoration projects, or in place of our ABS tubing for tanks, silos and other round structures. Precision Extruded in Clear Acrylic Plastic. Excellent clarity. Ideal for all facets of model building. See our Clear Acrylic heads (later in this Catalog) for use as end caps.

NOTE: $15^{" \prime}(375 \mathrm{~mm})$ Length.
All Clear Square Tubing is also available at double the shown length for twice the listed price. Just add ' L ' to the end of the Product Code. Example: CST-8L
All I.D.'s are round hole.

## ABS LARGE TUBING ASSEMBLIES

A quick and simple method for assembly of LARGE square and rectangular tubing. Unique design allows assembly of several hundred different sizes of square and rectangular shapes. Use for concrete columns in the construction of modern structures. May also be used to represent square steel or wood members in the construction of older structures. Also good for making boxes or other creative craft items.

## ABS TUBING COMPONENTS

Use for custom fabrication of square and rectangular tubing or boxed assemblies such as concrete columns in modern structures. $1 / 16^{\prime \prime}(1.6 \mathrm{~mm})$ alignment lip and notch corners allow fast, accurate assembly. Simply tape assembly together, then solvent bond along the joints. Precision Injection Molded in Light Gray ABS Plastic.

NOTE: 30 " $(750 \mathrm{~mm})$ Length.

## RECTANGULAR ABS TUBE

Use to represent cable trays in electrical power plants, or any other rectangular ducting. Special horizontal and vertical elbows may be found later in this Catalog. Precision Extruded in Medium Green ABS Plastic.

CODE: CT-27

NOTE: 30 " $(750 \mathrm{~mm})$ Length.

## HEMISPHERICAL DOMES

Use for vertical and horizontal tank ends when making storage tanks for oil processing plants, water, LP gas or food and grain. Great for school and craft projects, and home decor. Glue two together to make plastic spheres. Also great for eyes on puppets and robots. Precision Injection Molded in Acrylic, ABS or Butyrate Plastic. Code shown is for Clear Acrylic.

## ELLIPTICAL DOMES

Use for vertical and horizontal tank ends when making storage tanks for oil processing plants, water, LP gas or food and grain. Great for school and craft projects, and home decor. Glue two together to make plastic spheres. Also great for eyes on puppets and robots. Precision Injection Molded in Acrylic, ABS or Butyrate Plastic. Code shown is for Clear Acrylic.

## NOTE:

Now available in solid Gray ABS. To order add VG to the end of the Product Code. Example: VHD-225VG

## CONES \& TRANSITIONS

Use for ends on vertical tanks (water, sand, flour, etc.) or transitions from one size to another when making "cracking towers" for oil processing plants. Also great for rocket nose cones. Precision Injection Molded or Vacuum Formed in Medium Gray ABS Plastic.

## NOTE:

- These Products available in sheets of 5 Cones only.

Five different Cones; 3 bullet shapes with O.D. of $1^{\prime \prime}(25.4 \mathrm{~mm})$, $1-1 / 4^{\prime \prime}(31.8 \mathrm{~mm})$, and $1-1 / 2^{\prime \prime}(38.1 \mathrm{~mm})$ and $260^{\circ}$ pointed shapes with $1-1 / 2^{\prime \prime}(38.1 \mathrm{~mm})$ and $2^{\prime \prime}$ $(50.8 \mathrm{~mm})$. Vacuum Formed in $.030(0.8 \mathrm{~mm})$ Gray ABS.

CODE: VC-5

## ABS FLANGED CAP HEADS

Use for vertical and horizontal tank ends when making storage tanks for oil processing plants, or for heat exchangers. May also be used for manway covers. Precision Injection Molded in ABS and Butyrate Plastic. Code shown is for Medium Gray ABS.

## ABS NOZZLES

Use for attaching piping to tanks wherever piping is commonly found. Also used for representing manways, sight glasses and other tank accessories. Designed for use on all large ABS tubing; radius must be modified to fit the intended tank. Precision Injection Molded in Medium Gray ABS Plastic.

## BUTYRATE TUBING FITTINGS

Use with our Traditional Butyrate Round Tubing for piping systems found in industrial and commercial modeling, and for residential plumbing in dollhouse models. Also useful in model car roll cages, exhaust systems and scratchbuilt chassis. Ideal for stimulating creativity in educational programs utilizing our D\&T Packs. Fitting design allows temporary press-fit assembly, however final assembly must be cemented. Precision Injection Molded in Butyrate Plastic. Code shown is for White Color.

NOTES:
All Products on this page are also available in Black. To order, add BK to the end of the Product Code. Example: E-12BK

Sizes 3 through 24 are Injection Molded in one solid piece. Sizes 28 through 40 are Injection Molded in halves and assembled in a hollow form. Unusual configurations may be achieved by connecting several fittings together. Elbow style fittings not available for TB-1 and TB-2 because these have wire cores allowing bending.

E, EF, EL and ELF Elbows have a 1-1/2 times radius arc, B3 has a 3 times radius arc and BE has a 5 times radius arc. Therefore, the diameter created by four of these fittings is twice the arc times the O.D. of the fitting, i.e. E-4 creates a $3 / 8$ " circle.

## BUTYRATE TUBING FITTINGS

Use with our Traditional Butyrate Round Tubing for piping systems found in industrial and commercial modeling, and for residential plumbing in dollhouse models. Also useful in model car roll cages, exhaust systems and scratchbuilt chassis. Ideal for stimulating creativity in educational programs utilizing our D\&T Packs. Fitting design allows temporary press-fit assembly, however final assembly must be cemented. Precision Injection Molded in Butyrate Plastic. Code shown is for White Color, except CS \& CP which are
 Clear Butyrate Plastic.

## NOTES:

All Products on this page, except the clear Coupling Sleeves and Coupling Pins and the Hinge Sleeves, are also available in Black. To order, add BK to the end of the Product Code.
Example: BE-12BK

Sizes 3 through 24 are Injection Molded in one solid piece. Sizes 28 through 40 are Injection Molded in halves and assembled in a hollow form. Unusual configurations may be achieved by connecting several fittings together. Elbow (Bends) style fittings not available for TB-1 through TB-4 because TB-1 and TB-2 have wire cores, and TB-3 and TB-4 may be inserted with MIW insert wire to allowing bending.

Hinge Sleeves, when glued back to back or to another surface, work as hinges when fitted over corresponding Tubing.

## BUTYRATE TUBING FITTINGS

Use with our Traditional Butyrate Round Tubing for piping systems found in industrial and commercial modeling, and for residential plumbing in dollhouse models. Also useful in model car roll cages, exhaust systems and scratchbuilt chassis. Ideal for stimulating creativity in educational programs utilizing our D\&T Packs. Fitting design allows temporary press-fit assembly, however final assembly must be cemented. Precision Injection Molded in Butyrate Plastic. Code shown is for White Color.

## NOTES:

Pipe Clip Flanges may be used as Pipe Clip bases. SX-2 fit SC-1 through SC-8, and SX-3 fit SC-10 through SC-24.
All Valves come with the appropriate handwheel.
SC-2 may be used as a wrench in place of furnished handwheels on valve sizes 1 through 4, and SC-3 for valve sizes 6 through 24.

## HANDWHEELS/DISCS

Designed for use with our valves, but these simple items have many other uses. All have an I.D. of $3 / 32^{\prime \prime}(2.4 \mathrm{~mm})$. Precision Injection Molded in Medium Gray Butyrate Plastic.

|  | ACTUAL SIZE |  |
| :--- | :--- | ---: |
| CODE | O.D. |  |
| WH-8 | $1 / 4^{\prime \prime}$ | 6.4 mm |
| WH-12 | $3 / 8^{\prime \prime}$ | 9.5 mm |
| WH-16 | $1 / 2^{\prime \prime}$ | 12.7 mm |
| WH-20 | $5 / 8^{\prime \prime}$ | 15.9 mm |
| WH-24 | $3 / 4^{\prime \prime}$ | 19.1 mm |
| WH-28 | $7 / 8^{\prime \prime}$ | 22.2 mm |
| WH-32 | $1 "$ | 25.4 mm |
| WH-36 | $1-1 / 8^{\prime \prime}$ | 28.6 mm |

Set of four 4-spoked Handwheels in outside diameters of $5 / 32^{\prime \prime}(4 \mathrm{~mm}), 15 / 64^{\prime \prime}(6 \mathrm{~mm}), 5 / 16^{\prime \prime}(7.9 \mathrm{~mm})$ and $25 / 64^{\prime \prime}(9.9 \mathrm{~mm})$. The two smaller wheels fit our TB-3 and the two larger ones fit our TB-4. Precision Injection Molded in White Styrene Plastic.
Sold ONLY in sets.
CODE: HWL-4

## PUMP \& MOTOR SETS

Use in industrial and commercial settings wherever Pumps \& Motors would be found. Plastic sets include pump, motor and base plate. Pump and motor can easily be modified for special or unusual applications like turbines, blowers, etc. Precision Injection Molded in Light Gray and Medium Green ABS Plastic.

| STSS-1 | 1-1/4" | 31.8 mm | . 020 | 0.5 mm | Dark Gray |
| STSS-2 | 1-1/4" | 31.8 mm | . 030 | 0.8 mm | Dark Gray |

NOTE: $24^{" 1}(600 \mathrm{~mm})$ Length.

## FINELINE STYRENE STRIP STOCK

Useful thin strips of plastic for general scratch model building. Precision Extruded in White Styrene Plastic. Ideal for museum quality and smaller scale model construction where assembly speed and cost are the determining factors.

|  | ACTUAL SIZE |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | 'W' | ' $\mathbf{T}$ ' |  | COLOR |
|  | $1-1 / 4 "$ | 31.8 mm | .020 | 0.5 mm |
| STS-3 | $1-1 / 4$ ' | 31.8 mm | .030 | 0.8 mm | White | White |
| :--- |

NOTE: $24^{"}(600 \mathrm{~mm})$ Length.

## SOLID ABS RECTANGULAR \& SQUARE ROD

Useful rectangular and square solid plastic rod for general scratch model building. Precision Extruded in Dark Gray ABS Plastic. Ideal for all facets of model building.

| CODE | ACTUAL SIZE |  |  |  |
| :--- | :--- | ---: | ---: | :---: |
|  | 'H' |  | 'W' |  |
|  | $1 / 8{ }^{\prime \prime}$ | 3.2 mm | $1 / 8^{\prime \prime}$ |  |
| SAR-8 | $1 / 8^{\prime \prime}$ | 3.2 mm |  |  |
| SAR-12 | $1 / 8^{\prime \prime}$ | 3.2 mm | $1 / 4^{\prime \prime}$ |  |

## NOTE: $15^{" \prime}(375 \mathrm{~mm})$ Length.

ABS Rectangular \& Square Rod are also available at double the shown length for twice the listed price. Just add ' $L$ ' to the end of the Product Code. Example: SAR-8L

For smudge free bonding, apply a small amount of solvent cement with a blunt tipped syringe needle at one end of the parts to be joined and allow the cement to flow, through capillary action, the entire length and breadth of the joint. This will provide a "weld" as strong as the surrounding areas.
Be sure to use PLASTRUCT Plastic Weld or Bondene Cements.

## SOLID STYRENE ROUND ROD

Use for bracing, cabling, piping, wiring, conduit or wherever round stock is appropriate. Precision Extruded in White Styrene Plastic. Ideal for all facets of scratch model building.

|  | ACTUAL |  |

## STRIP \& ROD

## SOLID FLUORESCENT ACRYLIC ROUND ROD

A unique additive in the Acrylic actually gathers light from the sides of the rod and emits it from the ends. Originally developed for education, creative modelers are finding many other uses, including switch lights, auto tail lights, candles and neon signage. New Acrylic formula allows flexibility on $1 / 8$ " ( 3.2 mm ) and smaller size rods not known to Acrylic Plastics. Precision Extruded in Blue, Green, Red and Yellow Fluorescent Colored Acrylic Plastic.

## NOTE: 20 " $(500 \mathrm{~mm})$ Length.

Sizes $2,3,4 \& 5$ are also available at half the shown length for half the listed price. Just add ' H ' to the end of the Product Code.
Example: FARR-4H

Photo courtesy of JEMA Corp, Shinagawaku, Tokyo, Japan

All Acrylic Rods may be cut using a fine tooth saw blade. Cut ends should be polished using a flame or WET \& DRY fine grit sand paper. Bending may be accomplished by carefully softening the Acrylic using a torch flame or electric stove burner.

## SOLID CLEAR ACRYLIC ROUND ROD

## SOLID CLEAR ACRYLIC SQUARE ROD

Use for glass columns or where clear or painted square stock is appropriate. Also quite useful and attractive in crafts and educational projects. Precision Extruded in Clear Acrylic Plastic. Ideal for all facets of scratch model building.

## MIDWEST BASSWOOD STRIPS

Basswood Strips possess a close, tight, homogeneous grain structure, making it ideal for a wide variety of hobby, craft and architectural scratch model projects. Precision cutting provides consistent, high quality strips at economic prices. Preferred by most hobbyists because of its workability and finishing quality.

Photo courtesy of PLASTRUCT Japan, Tokyo, Japan

Wood structures are most commonly found along older and rural railroads. Modeling with wood is easy, and more preferable to plastic among many seasoned railroaders. There is no better way to achieve wood grain than by using wood. However, wood does have its disadvantages. While wood accepts most "white" glues, it takes much longer than plastic for the glued joints to set (usually a minimum of 20 minutes) and dry. Most woods have a "fuzz" that should be lightly sanded unless a rough finish is desired. Wood accepts most paints, but should first be primered. Sanding is suggested after a primer or first coat is applied. Wood can easily be stained and weathered using Minwax. Because stains will quickly be absorbed in wood, care should be taken to not over-soak wood sheets so that they do not warp. Cutting wood can be accomplished with most common hobby tools, including a hobby saw or knife.

## PLAIN \& PATTERNED SHEET

## GRAY ABS PLAIN SHEET

Possibly the most commonly used and preferred plastic sheet. Readily bonds to most plastics with solvent cements. Extremely strong, impact resistent and rigid, yet cuts with a sheet cutter or saw. Tougher than Styrene. Precision Extruded in Medium Gray ABS Plastic.

## CLEAR COPOLYESTER SHEET

An excellent clear plastic with many uses. Copolyester is tougher and less prone to split or shatter than Acrylic or Styrene, and is resistent to stress whitening. Can be cut with scissors, knife or sawn without burning. Glues well to itself, but when gluing to most other plastics an industrial grade Cyanoacrylate Glue is recommended. Precision Extruded.
Additional Clear Sheet may be found later in this Catalog.

## PLAIN \& PATTERNED SHEET

## WHITE STYRENE PLAIN SHEET

Hi-Impact PolyStyrene Sheet is now the second most commonly used material for general modelmaking. Thin sheets may be cut by scoring with a knife, while thicker sheets should be cut with a sheet cutter. Accurately Extruded in White Styrene Plastic.

## CLEAR ACRYLIC, BUTYRATE \& STYRENE SHEET

Three excellent clear plastics with many uses. Butyrate is tougher and less prone to split or shatter than Acrylic or Styrene, and is resistent to stress whitening. Acrylic is better for rigid applications, and Styrene is ideal where thinness is important. All glue well to themselves, or to most other plastics with common solvent cements. Precision Extruded. Additional Clear Sheet may be found on facing page and later in this Catalog.

## TINTED MIRROR SHEET

Use for interiors in G scale and dollhouse models, or for backgrounds in static model display cases, or to represent tinted glass in modern skyscraper/office buildings. Bonds and cuts like Styrene. The Polyester laminate will not peel
 when thin strips are cut.

## WORKING WITH PLASTIC PATTERNED SHEET

## INTRODUCTION

Professional model makers have used plastics as virtually their sole working material for the past 30 years. However, hobbyists, miniaturists and amateur model builders have, for the most part, continued to use wood, card and brass for their models. There are, of course, applications where those materials are suitable or desirable. But in most cases, PLASTRUCT should be your material of choice.

Time, care and skill are needed to get top results. Plastic usually allows easier and faster construction and creates better models. It is recommended to experiment with these techniques on some scrap pieces before committing to a scratch project. These tips are intended to get you on the right track. Your imagination and ingenuity will find many variations on the use and ways to finish PLASTRUCT Plastic Patterned Sheets.

## CUTTING \& FABRICATING

Basic construction of building shells is usually of a rigid material such as Acrylic, Styrene, Foamboard or plywood. PLASTRUCT Plastic Patterned Sheets can then be applied to create realistic simulated finishes.

These plastic sheets are easily cut with a hobby knife or scissors. For sheet application to a substrate surface, a general purpose spray adhesive or our GES-2 Silicone Adhesive is recommended. In some cases, our PLASTRUCT Plastic Weld or Bondene Cements are preferable, however, caution must be taken to ensure proper application; too much solvent cement may melt the plastic sheet. To remove solvent stains from Styrene sheets, use a Pink Pearl eraser or fine steel wool.

When surfaces larger than a single sheet are to be covered, in most cases, the patterns are designed to allow easy and undetected joining of multiple sheets.

## FINISHING \& PAINTING

When working with plastics, it is sometimes necessary to fill holes, cracks or joints. For small holes or cracks, any spot putty will work nicely. For larger holes or to create stucco or mortar, we recommend using Spackle or a suitable replacement.

Plastic Patterned Sheet materials representing brick, block, stone, etc. are usually furnished in a color suitable to common applications or effects. To get realistic mortar effects for joints, use a medium to dark concrete gray color flat finish paint of alkyd oil, latex or acrylic base. We recommend Delta or Tamiya (do not use lacquers). Using tissue or a paper towel, wipe the paint into the grooves with a circular motion. With a clean tissue, wipe the excess from the surface while the paint is still wet. If multiple wipings are necessary, take care to not remove paint from the grooves. A slight paint film should be left to soften the shinny surface of the Plastic Patterned Sheet. However, if you want to remove this film it is easily accomplished using steel wool or 220 grit garnet paper.

For variegated brick, paving or stone, the above procedure followed by individual brick or rock application of varied tones of the original color provide realistic results. Further texturing may be achieved by lightly spraying a similar color over the length of the sheet approximately 20 inches above the surface. This spray procedure is also quite effective on roof shingles and on plain surfaces where an aggregate look is desired.

Plastic Patterned Sheets in clear square tile are designed for ceramic tile. It is recommended these be painted on the reverse side to keep the high gloss appearance. If speckling is desired, first spray a light mist approximately 20 inches above the sheet. Or, another way to accomplish this is to dip a toothbrush into the desired speckling paint and then, holding the toothbrush approximately 20 inches above the sheet, run your thumb over the surface of the brush. Note, you should leave most of the surface unpainted. Allow to dry, then apply the main color either with a brush or spray. Fill the tile grooves with "grout" by wiping a suitable colored paint over the top surface of the sheet as described above. Or, you may simply draw in the "grouting" with a permanent waterproof marker.

When applying a wash color over the sheet, a No. 10 or larger camel hair brush is recommended. When painting individual bricks, use a No. 0 square tip brush. Individual stones should be painted with a No. 4 brush.

## SPECIAL USES

We have found that many of our Plastic Patterned Sheets can be used for hard-to-find or unusual applications. For your assistance, we provide a few below:
The reverse side of our PS-13, 16 and 19 can be used for large wood planking.
PS-25, 26 and 27 make excellent road and highway guardrails when cut into strips and mounted on square posts.
PSC-40 through 46 make great glass blocks for glass block walls.
PS-47 through 59 make excellent industrial vents when modified by adding Styrene Strips to every other slat. They can also be used as window awnings.
PS-145 works nicely as frosted glass for bathroom windows or shower stall glass.
PS-23 is another excellent method for shower stall glass.

## FINALLY

The following photographs of FINISHED Patterned Sheets demonstrate what is possible with a little time and experience.

PLASTIC PATTERNED SHEET

The World's most comprehensive range of Plastic Patterned Sheet for every aspect of architectural and hobby modeling. Roofing, flooring, siding, rockwork, metalwork, walls and water in all the popular scales. In most cases, the pattern design allows easy and invisible joints where large areas are modeled. Accurately Vacuum Formed in $.020(0.5 \mathrm{~mm})$ in grey, white or beige Styrene or clear Copolyester sheet. The listed scales are only suggestions as many patterns have no definitive size.

The following photographs provide a full-scale (actual size) image of the pattern, and all patterns are shown in their horizontal view. When reading sheet sizes, the first dimension is the horizontal (width) and the second is the vertical, or height.

RIBBED ROOF/CORRUGATED HO (1:100) SCALE CODE: PS-13
$12 " \times 7$ " ( $300 \mathrm{~mm} \times 175 \mathrm{~mm}$ ) (BEIGE)

When reading sheet size, the first dimension will be the horizontal, or width, and the second will be the vertical, or height.
(1) To order in Clear; replace the " B " in the Code Prefix with a " C ", i.e. WPSC-308
(2) Also available in 24 " $\times 14$ " $(600 \mathrm{~mm} \times 350 \mathrm{~mm})$ Sheet Size; add "XL" to end of Code, i.e. WPSC-308XL

## PLAIN \& PATTERNED SHEET

## PAPER PATTERNED SHEET

A wide variety of exterior and interior patterns in several popular scales. Printed appropriately on either glossy paper or heavy $.010(0.3 \mathrm{~mm})$ matte stock in an appropriate color to match the pattern. These sheets are easily applied to most surfaces using double stick tape or any other adhesive transfer mechanism. Please note, the listed scales are only suggestions, as many patterns have no definitive size.

The following illustrations provide a full-scale (actual size) image of the pattern, and all patterns are shown in their horizontal view. Dimensions are listed horizontal first, then vertical.

SOLD IN PACKAGES OF 2 SHEETS ONLY.

MAPLE WOOD PANELING DOLLHOUSE (1:12) SCALE CODE: PSP-20

## DETAIL \& ARCHITECTURAL PARTS

|  | ACTUAL SIZE |  |
| :--- | :--- | ---: |
| CODE | 'H' |  |
| AC-8 | $1 / 4^{\prime \prime}$ | 6.4 mm |
| AC-12 | $318^{\prime \prime}$ | 9.5 mm |
| AC-16 | $1 / 2^{\prime \prime}$ | 12.7 m |
| AC-20 | $5 / 8^{\prime \prime}$ | 15.9 mm |
| AC-24 | $3 / 4^{\prime \prime}$ | 19.1 mm |
| AC-32 | 1 "' | 25.4 mm |
| AC-40 | $1-1 / 4^{\prime \prime}$ | 31.8 mm |

Use wherever cubes or spheres may be found, as in modern geometric architectural sculptures, etc. Ideal for representing glass blocks in dollhouse/miniatures models. Also quite useful and desirable in crafts and home decor.

Add detail and character to your model or layout with these non-working, unique industrial mercury vapor and incandescent light fixtures and hardware. The incandescent with shade light can also be used as a safety shower, or as a drain or eye-wash when turned upside down. Mercury vapor lights may be mounted overhead or placed on a stanchion using stanchion hardware and appropriate tubing (stanchion applications do not require light shade). Lamp shades fit the light of the same Code Suffix. Precision Injection Molded in Medium Green ABS Plastic.

## DETAIL \& ARCHITECTURAL PARTS

## STYRENE PLASTIC SCALE AUTOMOBILES

Add detail and scale to your architectural model with these generic, nondescript automobiles. Mounting pin provides quick, permanent fastening to the model base. Dimensions given refer to the largest automobile (excluding van) in the scale. Sold in randomly packaged, mixed style assortments ONLY. Precision Injection Molded in White Styrene Plastic.

## STYRENE PLASTIC SCALE CITY FIGURES

Add detail and scale to your layout or model with these super detailed, animated city figure sets. One set consists of the figures pictured (SFI-24 figures are a slightly different pose than pictured. SFI-25 female head will need to be attached). Dimensions shown are for the tallest figure in the illustration. Precision Injection Molded in White Styrene Plastic.
Also available hand-painted (except SFI-24 \& SFI-501) as the illustration shows. To order, add P to end of code.
Example: SFI-87P

| CODE | STYLE | SCALE |  | ACTUAL HEIGHT |  | SETS / PKG. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## DETAIL \& ARCHITECTURAL PARTS

## STYRENE PLASTIC SILHOUETTE FIGURES

Add scale to your architectural model with these nondescript single and double silhouette figures. Packaged in random sets of 4 figures of the pictured poses. Mounting pins provide secure attachment to model base. Precision Injection Molded in White Styrene Plastic.

|  |  |  | ACTUAL |  | PKG. |
| :--- | :---: | ---: | :--- | ---: | :---: |
| CODE | SCALE |  | HEIGHT |  | QTY. |
| FIS-48 | $1 / 4^{\prime \prime}=1^{\prime}-0 "$ | $1: 48$ | $1-13 / 32^{\prime \prime}$ | 35.7 mm | 5 Sets |
| FIS-100 | $1 / 8^{\prime \prime}=1^{\prime}-0 "$ | $1: 100$ | $23 / 32^{\prime \prime}$ | 18.3 mm | 5 Sets |
| FIS-200 | $1 / 16^{\prime \prime}=1^{\prime}-0 "$ | $1: 200$ | $11 / 32^{\prime \prime}$ | 8.7 mm | 5 Sets |

## STYRENE \& POLYETHYLENE PLASTIC SCALE HOUSES

Add scale to your planning model with these assorted model houses. Packaged in mixed assortments of models. Illustration does not include all models within the scale. Dimensions are for the pictured model (largest in the scale), and include roof overhang. 1:900 and 1:1200 scales also include two-story homes. Precision Injection Molded in White Styrene Plastic or Polyethylene Plastic.

## 1:12 SHOWER/TUB ENCLOSURE KIT

Build your own shower/bathtub enclosure with this easy to use plastic kit. All pieces are already cut to size, ready to assemble and paint. Tub and tile sheet are clear, allowing you to choose a color to match your decor. Applying any acrylic paint to the reverse or underside will produce a high gloss finish. Tile pattern grooves allow applying "grouting" for a realistic look.

Kit includes Clear Tub, Clear Tile Sheet, Chrome Bath \& Shower Faucet Set (PHTC-12), and instructions.

CODE: KIT-8020

## PLASTIC SCALE LIVING ROOM FURNITURE

## PLASTURF \& GROUND FOAMS

Quality foliage, brush and turf Ground Foams in several grades and colors. Three types of foam to choose from: our Plasturf "standard ground foams", our "cellular ground foams" (has the appearance of lichen), and our extra-fine "felt-like ground foams". All are easily applied using spray adhesives, white glues or silicone adhesives. All foams are professional quality, will not dry out, fade or crumble with age.

## FOLIAGE FIBRE CLUSTERS

One step better than above, this non-metallic fibre material already has the foliage applied. Simply pull apart into a thin layer and drape over your tree armature. Attach with a general purpose adhesive or glue. Strong enough to hold it's shape, yet thin enough to not detract from the realism. Material cluster size $1 / 8^{\prime \prime}(3.2 \mathrm{~mm}) \times 4^{\prime \prime}(100 \mathrm{~mm}) \times 8^{\prime \prime}(200 \mathrm{~mm})$. Enough material to do 10 average trees.

## TURF MATTING

Grass green, paper-backed felt material allows instant landscaping. Ideal for school projects and doll house landscaping. May be used as grass sod, astro-turf or indooroutdoor carpeting. . $015(0.4 \mathrm{~mm})$ thickness.
Also great for craft and other projects around the home.
Comes in a roll to eliminate creases and seams.

## TREE ARMATURE WIRE

Make your own style of trees with this 36 " $(900 \mathrm{~mm})$ long, 7 strand $.070(1.8 \mathrm{~mm})$ wire. To use, cut wire $3 / 8^{\prime \prime}(9.5 \mathrm{~mm})$ longer than the desired tree height. Solder or glue with cyanoacrylate $1^{\prime \prime}(25.4 \mathrm{~mm})$ of one end of the wire. Unravel the wire to the desired configuration as illustrated. Paint appropriate color; and apply foliage when paint is dry.
CODE: TW-10

## ARMATURES

Use 'as is' to represent barren trees or easily modify by adding foliage to create "live" green trees.
Dimensions are approximate and may vary.

## PLASTREES BARREN TREES

The first, and the most authentic, flexible plastic tree armatures. Unlike other brands, these tree armatures are completely 3 -dimensional. Decorate to your liking, or use them as-is for barren trees. May be trimmed to create many different styles of trees. Additional forming of the smaller branches can be easily accomplished without heat. Foliage is easily added using a spray adhesive, rubber cement or our GES-2 silicone glue. Injection molded in a Brown Styrene blended Plastic. Dimensions are approximate and may vary.

## LANDSCAPING

## CUSTOM CHAIN LINK FENCE

Build your own chain link fence in the same manner as real life. First, install posts ( 75 " ( 1900 mm ) actual furnished), then attach fencing. Two ( $1-1 / 16^{\prime \prime}(27 \mathrm{~mm})$ high by $24^{\prime \prime}(600 \mathrm{~mm})$ long actual) strips of fencing included. Furnished height is $8^{\prime}(2.4 m)$ in HO scale. May also be used in other scales. The same material is also available in 7 " $\times 10^{\prime \prime}(175 \mathrm{~mm} \times 250 \mathrm{~mm})$ sheets (see later in this Catalog). To represent razor wire for security fencing, add curled piano wire or the equivalent to the top of your fence.

CODE: FEN-4

## PAPER ROADWAYS

Use for roads and parking lots on models requiring minimal realism such as school projects. $11-3 / 4^{\prime \prime}(300 \mathrm{~mm}) \times 26-3 / 4^{\prime \prime}$ $(675 \mathrm{~mm}) \times 5 \mathrm{mil}(.1 \mathrm{~mm})$ asphalt or concrete patterned printed paper may be applied directly to the model base or to a secondary rigid material and then attached to the model surface.

## PLASTIC LAKE OR POND

Create a lake or pond in seconds. Artistic shape will add character to your layout, doll house exterior or architectural model. Precision Injection Molded in Blue Acrylic Plastic. Dimensions approximately $3-1 / 2^{\prime \prime}(88.9 \mathrm{~mm}) \times 4-1 / 2^{\prime \prime}$ ( 114.3 mm ).

CODE: WPPB-3

## PLASTIC WATERFALL \& STREAM

Create a stream or waterfall in seconds. Realistic shape and texture will add character to your layout, doll house exterior or architectural model. Use together or separately. Dimension above waterfall listed as length, and height of waterfall listed as height. Precision Injection Molded in Blue or Clear Acrylic Plastic.

## CONTOURED TOPOGRAPHY FROM EXPANDED FOAM

## FLAT SITES

A thin sheet of foam (1/4" Urethane, $3 / 16$ " Foam Board or 1" Expanded Styrene) adhered to your plywood base makes an excellent working surface for many types of models. Paint the foam with latex or acrylic paint of the proper color. This will provide the perfect surface upon which to apply ground cover and makes tree "planting" an easy task.

## CONTOURED SITES

One of the simpler methods when precise contours are unnecessary is the layered method. The following example of this method requires three 1 " sheets of foam the full size of the base. However, in actual practice, you will probably use varying thicknesses.

1. Establish grade points at 1 " intervals from your contour map (See figures below).

2. Cut the 0 and 3 contours from your first sheet. Cut contours 1 and 4 from the second, and contours 2,5 and 6 from the third sheet. Scraps will be used for propping and miscellaneous fill-in. Use a serrated knife or hack saw with a sawing motion when cutting the contours.
3. Glue the levels of foam together with the appropriate glue (see our cement guide) and hold in position with nails until the glue dries (allow at least 24 hours). Consider nail placement so they will not affect contour shaping later.
4. With a hobby knife, cut the first contour elevation from your contour map and tack to the appropriate level of foam. With this as your guide, using a serrated knife or hobby knife, roughly trim off the excess foam from that level. Repeat this process until all levels have been trimmed. Remove contour map pieces.
5. Using coarse sandpaper and caution as foams sand easily, sand the contours smooth.
6. Paint the foam a color that will be a suitable undercoat for your finished landscape. Use latex or acrylic paint. OR, see our Polyterrain or Magic Earth materials.

## CORK SHEET

Two thicknesses of thin cork in 4 sheet sizes for topography, model base overlay or roadbed on model railroad layouts. Also great for architects, artists, craftspeople and hobbyists.

| CODE | ACTUAL SIZE |  |  |  |  |  |

## STYRENE \& URETHANE BLOCK FOAM

Here's a wide selection of Foams to meet most foam applications. Ideal for terrain or topographic models, or for block models left unfinished or finished with exterior detail. Included are 2\# density Expanded Polystyrene, and 6\# density Expanded Urethane Foams. The Polystyrene (STYS) has a very fine cell, providing a smooth surface which may be painted. Polystyrene foam may be cut with a saw, knife or hot-wire cutter. Urethane foams may be cut with a saw or knife only; hot wire cutter will emit toxic fumes. The 2\# density materials are light blue in color, the 6\# density is a dirty Brown.

| CODE | MATERIAL | DENSITY | ACTUAL SIZE |  |  |  |  |  | COLOR |

| STYS-36 | Expanded Polystyrene | 2\# | 12" | 300 mm | 36 " | 900 mm | 4" | 100 mm | Light Blue |

## STYRENE FOAM BOARD

Two thicknesses of White Styrene film laminated onto an Extruded Polystyrene Foam center. Versatile, extremely light weight and durable, the all plastic construction is moisture proof, eliminating the possibility of warping. Removing the Styrene skin from one side of the board allows bending. Accepts many paints. Ideal for model bases and building substrates. Also great for many other applications, such as sign making, school projects, picture mounting and more. Larger sheet sizes available upon quotation.

## GLUES, TOOLS \& ACCESSORIES

## PLASTIC WELD SOLVENT CEMENT

The leading general purpose solvent cement for fast, permanent bonding of most dissimilar plastics. Immediately tacky. Sets in minutes. Permanently bonds ABS to Butyrate, ABS to Styrene, ABS to Acrylic and more. Actually dissolves a thin film of the surfaces to be joined, creating a bond as strong as the surrounding areas. Also works as a liquid filler. Full coverage attained by capillary action. 2 oz . bottle comes with applicator brush in cap.
2 oz ( 59 ml.) Bottle.
CODE: PPC-2
16 oz ( 473 ml .) Can.
CODE: PPC-16

## BONDENE SOLVENT CEMENT

A specially formulated solvent cement for fast, permanent bonding of most similar plastics, including Styrene. Quickly bonds ABS to ABS, Styrene to Styrene, Butyrate to Butyrate and Acrylic to Acrylic. Actually melts the surfaces together, creating a bond as strong as the surrounding areas. Full coverage attained by capillary action. 2 oz bottle comes with applicator brush in cap.

CODE: BOND-2
16 oz ( 473 ml .) Can.
CODE: BOND-16

## WELD-ON \#4 ACRYLIC SOLVENT CEMENT

The best solvent cement for bonding most common Acrylic plastics to similar plastics (will not bond cross-linked Acrylics). Clear, water thin formula with a fast dry and cure time. Full coverage attained by capillary action. 16 oz ( 473 ml .) Can.

CODE: WOC-3

## GLUES, TOOLS \& ACCESSORIES

## CYANOACRYLATE GLUES

Here's a broad selection of Cyanoacrylate glues and associated products to meet most difficult bonding requirements. Three thicknesses of commercial quality glues along with a spray accelerator and a very valuable de-bonder give you total control in bonding most hard-to-glue applications. CAUTION SHOULD BE TAKEN WHEN USING THESE PRODUCTS.

| CODE | SIZE |  | DESCRIPTION |
| :--- | :--- | :--- | :---: |
| CONSISTENCY |  |  |  |

## 5, 15 \& 30 MINUTE EPOXY CEMENTS

Three excellent, Two-Part Epoxy Glues for general modeling use. Ideal and recommended when gluing foams and dissimilar materials. Cure times are 5,15 or 30 minutes. The two $2-1 / 4 \mathrm{oz}$. ( 67 ml .) bottles are graduated for easy and accurate mixing.

|  |  |  |
| :--- | :---: | :---: |
| CODE | SIZE | DESCRIPTION |
| EPX-5 | $4-1 / 2$ oz. 133 ml. | 5 Minute Epoxy Cement |
| EPX-15 | $4-1 / 2$ oz. 133 ml. | 15 Minute Epoxy Cement |
| EPX-30 | $4-1 / 2$ oz. 133 ml. | 30 Minute Epoxy Cement |

## GE SILICONE II GLUE

An excellent, thick bodied, flexible glue for general modeling use. Ideal and recommended when gluing Styrene Plain and Patterned Sheets. The thick body fills pattern voids, providing better adhesion. Also ideal as a tree planting glue. Does not melt the plastic, dry out, crack or discolor. 2.8 oz . ( 83 ml .) Tube with applicator nozzle.

CODE: GES-2

## GLUES, TOOLS \& ACCESSORIES

## MILLIPUT EPOXY PUTTY

Three grades of two-part epoxy putty for modeling, repairing household items or sculpting. Works like putty, hardens like rock in two to three hours, and may be machined like plastic or wood. Adheres to and will seal or bond metals, wood, plastics, glass, ceramics or even cement.
MEP-1 and MEP-2 are for general use, while MEP-3 is preferred where fine detail is desired.

| CODE | SIZE |  | COLOR / CONSISTENCY |
| :---: | :---: | :---: | :---: |
| MEP-1 | 4 oz . | 113 gr . | Yellow-gray / Regular |
| MEP-2 | 4 oz . | 113 gr . | Silver-gray / Regular |
| MEP-3 | 4 oz . | 113 gr . | White / Fine |

## ALUMILITE QUICK-SET RUBBER

Alumilite Quick Set RTV Silicone Rubber allows fast reproduction of almost any master pattern. Unlike most rubber mold materials, this unique material has a 30 minute working time and cures in just 4 hours.
$1 \mathrm{lb} .(.45 \mathrm{~kg}$.$) package includes catalyst.$

CODE: ALUM-16

## ALUMILITE 10 MINUTE PUTTY

Alumilite 10 Minute Silicone Putty allows immediate reproduction of almost any small master pattern. Eye-ball equal amounts of the two parts and kneed them together for about 45 seconds. Press your master and, in 10 minutes, you are ready to pour your casting material.
$1 \mathrm{lb} .(.45 \mathrm{~kg}$.$) package.$
CODE: ALUM-1

## ALUMILITE LIQUID CASTING PLASTIC

Alumilite is a two-part, white liquid casting plastic that goes from liquid to solid in just three minutes. It is easy to use, virtually odorless, and will duplicate any part, down to the most minute detail. It can be easily sanded, drilled, machined, painted or even plated. Alumilite comes with equal 14 oz . ( 414 ml .) bottles of the two-part chemicals, measuring cups, mixing sticks and working instructions.

CODE: ALUM-28

NEED IT FAST?

## GLUES, TOOLS \& ACCESSORIES

## VINYL MOLDING COMPOUND

Meltable, flexible molding compound, ideal in forming flexible molds for casting reproductions with most casting resins. Made of a composition of Vinyls, few tools and only simple equipment are required. Can be rendered for mold making by low to medium heat on a domestic stove using a saucepan. Unlike most other flexible mold compounds, worn or obsolete molds may be cleaned and re-melted many times over, dependent upon the care and control exercised during melting. Instructions and safety data included. 1 lb . $(.45 \mathrm{~kg}$.$) package.$

Melting temperature is $302^{\circ}-338^{\circ} \mathrm{F}\left(150^{\circ} \mathrm{C}-170^{\circ} \mathrm{C}\right)$; pouring temperature is $284^{\circ}-302^{\circ} \mathrm{F}\left(140^{\circ} \mathrm{C}-150^{\circ} \mathrm{C}\right)$.

CODE: MMC-16

## PVC GLOVES

Surgical style, industrial grade, disposable, PVC Gloves for use when casting with Polyurethane casting resins or whenever you feel added safety is best. Also great for household chores or wherever chemicals are used. Furnished in pairs.

CODE: CDG-2

## DOUBLE SIDED ADHESIVE SHEET

Permanent double sided clear adhesive sheet. Great for flat bonding of plastic sheets, wall paper, photos, etc.
2 sheets per pack. Sheet size: 6-3/4" x 12" (172mm x 300mm)
CODE: SCKP-1

## VINYL ELECTRICIANS TAPE

Versatile vinyl electricians tape for temporary holding of assemblies and jigs as well as numerous other jobs.

CODE: ET-1

## SOLVENT SYRINGES

Three Solvent Syringes for accurate and clean application of solvent cements. Blunt needle allows exact placement of solvent in hard to reach places. Note: Dipping plunger in solvent before inserting into barrel will help with plunger sticking.

|  |  |
| :--- | :---: |
| CODE | CAPACITY |
| HT-8 | $3 c c$ |
| HT-10 | $10 c \mathrm{c}$ |

## SOLVENT DISPENSER

The ideal dispenser for solvent cements. Stainless-steel pump unit with Polypropylene bottle withstands most solvents. Light pressure on dispensing dish instantly pumps desired amount of solvent into the dish. No spills, fumes or contamination. Not recommended for any viscous or bodied cements. 4 oz . (116ml) bottle.

CODE: HT-612

## SOLVENT APPLICATOR DROPPER

1 oz ( 29 ml .) capacity bottle with "eye-dropper" blunt applicator needle allows precise assembly with solvent cements.

CODE: HT-1

## STAINLESS STEEL MODEL SCALE RULERS

One of the most useful and necessary tools in model building, quality, stainless steel rules in $6 "(150 \mathrm{~mm})$ pocket and $12 "(300 \mathrm{~mm})$ bench models. The "All Railroad" scale rules include $\mathrm{O}, \mathrm{S}, \mathrm{HO}$, N and Z scales.

| CODE | LENGTH |  | SCALE |  |  |

## HOBBY SAW

Excellent Hobby Saw has a $1-3 / 16^{\prime \prime}$ ( 30.2 mm ) deep by $6-1 / 2^{\prime \prime}(127 \mathrm{~mm})$ long blade with 32 teeth per inch $(25.4 \mathrm{~mm})$. Replacement blade is $\mathbf{5 - 1 / 2}$ long.

CODE: HT-500
Replacement Blade.
CODE: HT-508

## HOBBY KNIFE

Handy Hobby Knife with sure-grip handle and rear blade release, insuring blade stability. Clear blade shield included.

CODE: HT-391

## Replacement Blades.

Pack of 5 Blades. CODE: HT-392

## PLASTIC SHEET CUTTER

Scribe and break sheet to any size or shape with this handy tool. Most
 plastic sheets will break cleanly when scribed $3 / 4$ through the thickness. Blade never needs replacing.

CODE: HT-2

## HOBBY MITRE BOX

Aluminum Hobby Mitre Box makes cutting plastic and wood model parts easy and accurate. $5-1 / 2^{\prime \prime}(140 \mathrm{~mm})$ long, $1-3 / 4^{\prime \prime}$ ( 45 mm ) wide and $3 / 4^{\prime \prime}$ ( 19.1 mm ) deep.

CODE: HT-533

## GLUES, TOOLS \& ACCESSORIES

## 6" STRAIGHT HEMOSTATS

$6 "(150 \mathrm{~mm})$ long surgical quality Straight Hemostats make tight work easy. Serrated lock jaws allow continuous gripping for positioning and setting. Stainless steel.

CODE: HT-42

## RIVET TOOLS

Three unique tools for quickly and easily indenting rivet heads on thin plastic. Pin point rollers create rivet heads on the back side of sheet or strip plastic using medium pressure. Simply scribe a guide line on the back side of your plastic and roll the Rivet Tool along the line for instant rivets.

| CODE | PATTERN <br> SPACING |  | RECOMMENDED <br> SCALE |  |

## CRAFT HOT-WIRE FOAM CUTTER

Battery operated, hand held hot wire cutter for cutting small pieces of Expanded Polystyrene Foam. Ideal for small hobby and craft projects as well as floral design.
The tension arm height allows cutting pieces up to $1-1 / 2^{\prime \prime}$ ( 38 mm ) thick. Operates on 2 D -Cell batteries (not included) that fit into the handle.

WARNING: NOT DESIGNED FOR CUTTING URETHANE FOAMS

CODE: PT-710

Replacement Wire

3 piece pack
CODE: PT-712

## THE CHOPPER

The Chopper from Northwest Shortline, one of the most useful tools ever for rapid and accurate cutting of wood or Styrene strip \& rod and small profiles. Provides clean, neat, feather-free, accurate cuts with a single edge razor blade. Included mitre allows accurate $30^{\circ}, 45^{\circ}$ and $60^{\circ}$ cuts. An adjustable stop permits exact duplication of pieces up to $3-1 / 4^{\prime \prime}(82.6 \mathrm{~mm})$ long. Three extra cutting blades included.
Base size $7-1 / 2^{\prime \prime}(190 \mathrm{~mm}) \times 7-1 / 2^{\prime \prime}(190 \mathrm{~mm})$.

CODE: HT-700

## Replacement Blades.

Pack of 8. CODE: HT-702

## THE CHOPPER II

The Chopper II from Northwest Shortline, who took one of the most useful tools ( The Original Chopper) and made it even better. A great tool for rapid and accurate cutting of wood, Styrene strip \& rod and small profiles. Provides clean, neat, feather-free, accurate cuts, of any angle, with a single edge razor blade. Included precision guides allow accurate $30^{\circ}, 45^{\circ}$ and $60^{\circ}$ cuts. Premium all metal base and handle. Base size $7-1 / 2^{\prime \prime}(190 \mathrm{~mm}) \times 7-1 / 2^{\prime \prime}(190 \mathrm{~mm})$.

CODE: HT-703

## Replacement Blades.

Pack of 8. CODE: HT-702

## THE CHOPPER III

The Chopper III from Northwest Shortline is another great tool for rapid and accurate cutting of wood, Styrene strip \& rod and small profiles. Provides clean, neat, featherfree, accurate cuts, of any angle, with a single edge razor blade. Included precision guides allow accurate $30^{\circ}, 45^{\circ}$ and $60^{\circ}$ cuts. Designed after "The Chopper" (HT-700) except this one has a base size of $7-1 / 2^{\prime \prime}(190 \mathrm{~mm}) \times 18^{\prime \prime}$ $(457 \mathrm{~mm})$ wide providing space for more easily working with longer materials. Has room for two additional handles (not included) for modelers and professionals who wish to keep 1, 2 or 3 work station set-ups intact at one time.

CODE: HT-710
Replacement Blades.
Pack of 8. CODE: HT-702

## GLUES, TOOLS \& ACCESSORIES

## THE TRUE SANDER

The New, True Sander from Northwest Shortline, is a great companion to The Chopper as a useful tool for rapid and accurate finishing of wood or Styrene strip \& rod and small profiles. Provides a perfect, square-fit end to most model parts. Aluminum sanding block will accept any commercially available sand paper. Included mitre allows accurate $30^{\circ}, 45^{\circ}$ and $60^{\circ}$ angles. Base size $7-1 / 2^{\prime \prime}(190 \mathrm{~mm}) \times 7-1 / 2^{\prime \prime}(190 \mathrm{~mm})$.

CODE: HT-705

## BERNA ASSEMBLERS

A versatile, lightweight, clamping system, more convenient and easier to use than the conventional metal or plastic clamps. Each assembler allows complete control of force applied with flexible rubber buffers that adjust to contours in the model part. Package contains two large and one small assembler, connectors and complete instructions.

CODE: HT-725

## WINDOW SCREEN/FENCE MESH

7" ( 175 mm ) x 10 " ( 250 mm ) flexible mesh ideal for doll house or large scale model railroad buildings window screen material. Manufactured from a poly vescus material, it can easily be cut with scissors or a hobby knife.
Sold in packages of 2 pieces.
CODE: SWM-12

## GLUES, TOOLS \& ACCESSORIES

## FIBER OPTICS LIGHTING

Use the lighting technique of tomorrow, today. Light an entire city with one light bulb. Verasatile and easy to use; instructions come with each purchase. The only thing not included is the light source. Available in loose strands or on bulk spools. FOP4000 is a jacketed multi-strand bundle.

|  | PKG. | ACTUAL SIZE |  |  |  |
| :--- | :---: | :---: | :--- | :--- | :--- |

| FOP-1010 | 1 | .010 | 0.3 mm | $300^{\prime}$ | 91 m |
| FOP-1020 | 1 | .020 | 0.5 mm | $200^{\prime}$ | 61 m |
| FOP-1030 | 1 | .030 | 0.8 mm | $150^{\prime}$ | 45 m |
| FOP-1040 | 1 | .040 | 1.0 mm | $100^{\prime}$ | 30 m |

## FLUORESCENT FIBER OPTICS

A unique additive gathers light from the sides of the strand and emits it from the ends. Add colorful lighting to models without a lightbulb. Versatile and easy to use; instructions come with each purchase.

Use for tail lights in car modeling, signal lights in model railroading, or even target sights. Great for artistic craft projects too.

## PLASTABETS PLASTIC LETTERS

Plastic letters and numbers for lettering model store fronts and other buildings, name plates, displays as well as real-life floor directories. The uses are limitless. Approximately 160 characters per set. For blemish-free application, soak a sponge with one of our solvent cements and, using tweezers, touch the underside of the letters to the sponge before placing in position. Precision Injection Molded in White Styrene Plastic.

## VINYL LETTERS \& NUMBERS

Plastic Vinyl letters and numbers for lettering model store fronts and other buildings, name plates, displays, signs as well as school presentations. The uses are limitless. Available in either white or black color, these self-adhesive characters make lettering and numbering easy. May be applied to most all surfaces. Durable adhesive and weather resistent material make these great for outdoor applications too.

## TRACKSIDE SERIES KITS

All "TRACKSIDE SERIES" Kits are "scratch model" Kits and contain detailed plans/instructions and the necessary plastic parts to complete the pictured model. The step-by-step instructions include information about the model proto-type, bills of material, detailed drawings and helpful construction tips. Colorful oil company decals are provided when appropriate.
THESE KITS ARE NOT INTENDED FOR NOVICE MODELERS.
PLEASE SEE THE FOLLOWING PAGES FOR FURTHER KIT DESCRIPTION

KIT-1

## SIMPLE SPAN BRIDGES

Two authentically engineered Simple Span Bridges to add interesting detail to any layout. May be used to fit many applications, including highway, railway or terrain crossing. Kit contains enough parts to construct one of each bridge. Landscaping not included.
See page 121 for complete Kit listing.

## TRUSS BRIDGE

The grandfather of bridges, authentically duplicated in plastic. This Truss Bridge is the most common steel bridge found in North America, if not the world, and fits both steam and diesel eras. Can be easily modified in length or width to fit all your needs. The importance of this bridge design was that greater distances could be spanned, resulting in less supports. A river or gorge can be crossed with fewer piers while still supporting sizeable loads. This Kit reflects a $120^{\prime}-0^{\prime \prime}(36.5 \mathrm{~m})$ long, $1^{\prime}$ ' $-\mathbf{0}^{\prime \prime}(5 \mathrm{~m})$ wide (single track) steel truss bridge. Realistic detailing tips allow unequalled realism and make this structure a definite foreground focal point. For a real attention getter, put two or three in-line over one span. A must for every layout. See page 121 for complete Kit listing.

KIT-2

KIT-7

## OLD-TIME MOVING BRIDGE

Here is a replica of one of the first draw bridges that actually opens horizontally, not vertically, by means of a central pivot system. The real bridge, now abondoned, may be found crossing the Christina River in Delaware as part of the Pennsylvania Railroad, Delmarva division. It's a scratch builder's dream having character and charm, and a challenge to your detailing expertise.
See page 121 for complete Kit listing.

## ELECTRICAL TOWERS \& OIL WELL

Your modern day countryside layout won't be complete without Electrical Towers. Add life-like realism to your layout with this two-part Kit. Construct these towers in the same manner as your local power company and place them throughout the countryside. Or build yourself an oil drilling rig to supply your refinery. In either case, these graceful structures will add beauty and character to your layout. Kit contains enough parts to build both Electrical Towers OR one Oil Well.
See page 121 for complete Kit listing.

KIT-5

KIT-12

## TWIN LAMP POSTS

Simple to build 45 ' Twin Lamp Post with numerous uses including railroad service, terminal and yard lighting, or city street, industrial and security lighting. These lamp posts look best when used in multiples, and can help to visually group or integrate various viewing areas on your layout. This Kit consists of four lamp posts and is typical of those found in industrialized nations. They fit any time period between 1950's and today. See page 121 for complete Kit listing.

## TRACKSIDE SERIES KITS

## BILLBOARDS

No contemporary layout is complete without the great American Billboard. From rural countryside to major metropolis, you can't escape these colorful structures. This Kit depicts the modern day steel type and contains enough material to build four independent billboards, including posters.
See page 121 for complete Kit listing.

KIT-13

KIT-10

Service Platforms are an integral and common part of a locomotive maintenance and repair yard. These all-welded steel structures can be easily modified to meet most needs including loading docks or ramps. Place these platforms throughout your layout wherever maintenance or loading is performed. Kit contains enough material for two "standard" platforms.
See page 121 for complete Kit listing.

## SILOS \& GRAIN ELEVATOR

Grain Elevators and Silos are found scattered throughout agricultural America. The generic design of this kit allows total flexibility in construction. Silos are more commonly used by individual farmers and are usually smaller in size, fabricated in steel and used for storing winter feed such as corn silage. Grain elevators, frequently part of a co-op, are typically quite tall, made of concrete and used to accumulate or store harvest crops awaiting sale. This Kit will produce three tanks. Dimensions and capacities vary dependent on scale.
See page 121 for complete Kit listing.

KIT-25

## SAND TOWER

This all-welded steel Sand Tower is used in engine facilities throughout the country. Sand towers are usually located near the roundhouse or light service repair facility. The design of this sand tower permits installation between in and outbound tracks to service four lines. It's primary function is to supply clean, dry sand for gaining traction on slippery rails.
See page 121 for complete Kit listing.

KIT-11

## HEMI BOTTOM WATER TANK

This realistic modern Hemispherical Bottom Water Tank holds approximately 100,000 gallons and was used by many railroads during the busy steam era. Complete with a separate water spout and drain, this tank was commonly found in servicing facilities as well as along trackside. All-welded towers were constructed from the mid-1930's to present day. Adding rivets along the weld seams can date the tank back to the 1900's. Landscaping not included.

KIT-9

See page 121 for complete Kit listing.
Plastruct

KIT-15

## BULK OIL STORAGE TANK

This cone roof Bulk Oil Storage Tank is commonly found at petroleum refineries, bulk fuel terminals or chemical plants. Other applications can include water storage or liquids used in food processing. Tanks featuring all-welded construction became popular in the mid1930's and are still being used today. Dimensions and capacities vary dependent on scale.
See page 121 for complete Kit listing.

## LIQUID OXYGEN STORAGE TANK

This Liquid Oxygen Storage Tank is usually found where oxygen is used or produced in bulk quantities. Other products may also be stored in this vertical pressure vessel. This tank of all-welded construction is typical of those built from the mid-1930's to present day. Dimensions and capacities vary dependent on scale.
See page 121 for complete Kit listing.

KIT-17

KIT-18

## SIDE BY SIDE VERTICAL TANKS

These Side By Side Vertical bulk liquid storage Tanks are commonly found at petroleum refineries, bulk fuel terminals or chemical plants. Other applications include industrial fire water storage, municipal water storage or liquids used in food processing. Any product stored at atmospheric pressure is suitable for these tanks. Tanks featuring this design were commonly used beginning in the mid-1930's, and are still used today. The majority were built in the 1950's for the growing petroleum industry. Tank dimensions and capacities vary dependent on scale.
See page 121 for complete Kit listing.

## SPHERICAL STORAGE TANK

Spherical Storage Tanks are primarily used to store petroleum and chemical products stored under pressure such as Benzene, Amonia, Liquid Propane and Butane. Cryogenic products such as Liquid Oxygen and Nitrogen are also stored in this type of tank. All-welded spherical tanks were constructed in the mid-1940's to present. Dimensions and capacities vary dependent on scale.
See page 121 for complete Kit listing.

KIT-26

KIT-27

## FLOATING ROOF STORAGE TANK

External Floating Roof Storage Tanks primarily store oil or chemicals whose vapor pressure causes evaporation at atmospheric pressure such as Crude Oil, Gasoline, Jet Fuel and Naptha. Dangerous $\mathrm{H}_{2} \mathrm{~S}$ (Hydrogen Sulfide) gases are present in all crude oils, necessitating the use of this tank. Floating roof tanks operate by the roof floating on top of the product being pumped into the tank, thus eliminating any vapor space and therefore vapor discharge. All-welded floating roof tanks were employed in the late 1940's, and are still being used today. Dimensions and capacities vary dependent on scale.
See page 121 for complete Kit listing.

## UTILITY WATER TOWER

This flat bottom, dome roof Utility Water Tower is typically found at factories for fire water. Municipalities also employ these towers for potable water and as a means of maintaining water pressure. Legs may be shortened or even eliminated completely so that the tank can be installed on a building roof. All-welded water towers became popular in the mid-1930's and are still being constructed today. Adding rivets along the weld lines can date this tower back to the early 1900's. Tank dimensions and capacities vary dependent on scale.
See page 121 for complete Kit listing.

KIT-16

KIT-28

## CONE ROOF WATER TOWER

The popular Cone Roof elevated Water Tank is typically found in industrial settings being used for fire water at factories, or potable water in communities and industry. The angled legs may be shortened for roof installations. This style of tank is often found in multiples in larger communities or facilities. All-welded elevated water tanks were constructed in the early 1940's, and are still quite popular today. Adding rivets along the weld lines dates the tank back to the early 1900's. Tank dimensions and capacities vary dependent on scale. See page 121 for complete Kit listing.

## PETRO/CHEMICAL REFINERY

An authentic miniature Petro/Chemical Refinery developed by a professional design engineer with one of the country's leading consulting engineer and construction firms. This realistic Kit contains all the necessary parts to construct the model as pictured along with detailed blue prints and an instruction booklet. Engineered with flexibility, you can easily change equipment locations to fit your layout. Perfect for any 1950's to present day model railroad layout. Prior scratch building experience recommended. NOTE: Several of the other industrial Kits make excellent additions to this Refinery. See page 121 for complete Kit listing.

KIT-8

KIT-14

## TWIN HORIZ. STORAGE TANKS

These Twin Horizontal Storage Tanks are commonly found at petroleum refineries, bulk fuel terminals or chemical plants. Other applications can include water storage or liquids used in food processing and manufacturing. Tanks featuring all-welded construction became popular in the mid-1930's and are still being used today. Dimensions and capacities vary dependent on scale.
See page 121 for complete Kit listing.

## TWIN LP GAS STORAGE TANKS

These Twin horizontal LP Gas Storage Tanks are typically found throughout rural northern and central America in bulk fuel distributor and LP Gas retail outlets. LP Gas is commonly used for agricultural, industrial and residential heating as well as an up-and-coming vehicle fuel. Dimensions and capacities vary dependent on scale.
See page 121 for complete Kit listing.

KIT-19

## TRACKSIDE SERIES KITS

KIT-40

## STEEL MILL BOTTLE CAR

Bottle Cars are an integral and unique piece of rolling stock for the steel industry. This Kit, originally created in cooperation with Dean Freytag and Railroad Model Craftsman (RMC), allows custom construction of 2 12 wheel Pollock Bottle Cars. Kit instructions are actually the RMC article originally published in November, 1994. A must for every layout incorporating a steel mill.
TRUCKS, COUPLERS AND HARDWARE NOT INCLUDED.
See page 121 for complete Kit listing.

## STEEL MILL FAKEFRONT

This Kit, developed by Dean Freytag to fill a void between two areas of the Fellows Steel Mill, is an impressive, yet simple, structure. The left building, originally intended as a hot metal car / ladle additive facility, is $12^{\prime \prime}(300 \mathrm{~mm})$ high x $9^{\prime \prime}(225 \mathrm{~mm})$ wide and only $3-1 / 2^{\prime \prime}(88 \mathrm{~mm})$ deep. The center and right buildings, intended as part of the supporting buildings for the basic oxygen furnace, are approximately $10^{\prime \prime}(250 \mathrm{~mm})$ high $\times 13^{\prime \prime}$ ( 325 mm ) wide, and $2^{\prime \prime}(50 \mathrm{~mm}$ ) deep (center building) and flush (right building). However, don't be limited by these intended uses. This Kit has the versatility to switch building positions and can easily be adapted as part of many industrial by-product facilities. It can also be used in multiple scales! A must for all layouts incorporating a steel mill or other industrial facilities.
See page 121 for complete Kit listing.

KIT-30

## SINTERING PLANT FAKEFRONT

This Sintering Plant is actually three kits in one; the Sintering Processing Building. Materials Bunker and the Blower Assembly. However, it is not limited only to this function and may be modified to fit many other industrial facilities. The overall dimensions are 30 " ( 762 mm ) wide by 18 " ( 457 mm ) high (includes stack) by 7 " ( 178 mm ) deep.
See page 121 for complete Kit listing.

## KIT-31

## LIME BUILDING FAKEFRONT

This Lime Building is a replica of a lime processing building used by Copper Smelting companies. However, it is not limited only to this function and may be modified to fit many other industrial facilities. The overall Dimensions are 18 " ( 457 mm ) wide by $12-1 / 2^{\prime \prime}$ ( 317 mm ) high (includes elevator) by 5 " ( 127 mm ) deep.
See page 121 for complete Kit listing.

KIT-32

## D \& T TECHNOLOGY AND EDUCATION

## MINIATURE ELECTRIC MOTORS

## HEAVY DUTY MOTOR

Heavy Duty Motor for larger projects and when higher torque is required. 2-1/2" ( 63 mm ) Length, $1-1 / 2^{\prime \prime}(38 \mathrm{~mm})$ O.D. with a shaft diameter of $1 / 8^{\prime \prime}$ $(3.2 \mathrm{~mm})$. 6 to 12 Volts, 7 to 14,000 RPM.

CODE: MOT-10

## OUTBOARD MOTOR

Safe water operation using two AA batteries (not included). High speed propulsion with bolt-on convenience. $5^{\prime \prime}(125 \mathrm{~mm})$ high, $2-1 / 2^{\prime \prime}(63 \mathrm{~mm})$ long.

CODE: MOT-45

## MOTOR MOUNT

Motor Mount for small motors from 3/4" (19mm) O.D. to 1 " ( 25 mm ) O.D. Plastic, expandable bracket with self-adhesive pad 1" ( 25 mm ) x 1" $(25 \mathrm{~mm})$ provides fast and easy mounting.

CODE: MNT-1

## MOTOR REDUCTION UNIT

Motor Reduction Unit includes a small, powerful $1.5-6 \mathrm{~V}$ motor, worm gear assembly with shaft bracket and screws. Power available at both ends of a 4 mm shaft. Provides a $50: 1$ reduction. Minor assembly required.

CODE: MOTRED-1

## MINI MOTOR 1

A low cost miniature Motor offering a high stall torque. 1-1/2" ( 38 mm ) length, $7 / 8^{\prime \prime}(22 \mathrm{~mm})$ O.D. with a shaft diameter of $5 / 64^{\prime \prime}(2.0 \mathrm{~mm})$. 1.5 to 6 Volts, 2 to 5,000 RPM.

CODE: MOT-1

## MINI MOTOR 2

A slightly larger Motor offering a high stall torque. 1-3/4" (44mm) length, 1 " $(25 \mathrm{~mm})$ O.D. with a shaft diameter of $5 / 64^{\prime \prime}(2.0 \mathrm{~mm})$. 1.5 to 6 Volts, 2 to 7,000 RPM.

CODE: MOT-2

## MOTOR REDUCTION UNIT

Heavy Duty Motor Reduction Unit includes a more powerful 1-15V motor with a single ratio metal gearbox. Metal gears with bronze bearings ensure very high torque and quiet operation. $4-1 / 2^{\prime \prime}$ ( 113 mm ) length with $15 / 64^{\prime \prime}(6.0 \mathrm{~mm})$ shaft. Provides a 150:1 reduction. Minor assembly required.

CODE: MOTRED-2

## SUBMARINE MOTOR

Safe underwater operation with one AA battery (not included). Suction cup allows easy installation to any water vessel. $4-3 / 4^{\prime \prime}(120 \mathrm{~mm})$ long, $1^{\prime \prime}(25 \mathrm{~mm})$ O.D.

CODE: MOT-40

## D \& T TECHNOLOGY AND EDUCATION

## WHEELS \& TIRES

## VARIABLE AXLE WHEEL SETS

Five sets of four $1-3 / 16^{\prime \prime}(30.2 \mathrm{~mm})$ O.D. wheels with axle Reducers. Injection molded in High Impact Polyethylene for long life and quiet operation. $1 / 4^{\prime \prime}(6.4 \mathrm{~mm})$ thickness allows easy handling for students of all ages.
All Wheels have a $.156(4.0 \mathrm{~mm})$ shaft hole to fit our $5 / 32$ " ( 4.0 mm ) O.D. axles. Axle reducers allow simple conversion to $.110(2.8 \mathrm{~mm})$ shaft hole for our $1 / 8{ }^{\prime \prime}(3.2 \mathrm{~mm})$ axles. Design allows multiples to be snapped together as rollers. Sold In bags of 5 sets only.

CODE: WHLS-40

## HEAVY DUTY WHEELS WITH TIRES

Heavy duty plastic wheels with black PVC tires provide the strength to support carts, dollys and other heavy weight items. Designed for use with $1 / 4$ " ( 6.4 mm ) axles.

| CODE | STYLE | DESCRIPTION | ACTUAL SIZE |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | O.D. |  | THICKNESS |  |
| WHL-75 | A | Standard Wheel | 3 " | 75 mm | 5/8" | 15.9 mm |
| WHL-100 | A | Standard Wheel | 4" | 100 mm | 5/8" | 15.9 mm |
| WHL-101 | B | Spoke Wheel | 4" | 100 mm | 5/8" | 15.9 mm |
| WHL-102 | c | Tractor Wheel | 4" | 100 mm | 1-1/8" | 28.6 mm |

## WOODEN WHEELS

Heavy duty wooden wheels provide the strength to support medium weight items. Designed for use with $1 / 8^{\prime \prime}(3.2 \mathrm{~mm})$ axles. Made from Birch wood.

| CODE | ACTUAL SIZE |  |  |  |
| :--- | :--- | ---: | :--- | ---: |
|  | O.D. |  | THICKNESS |  |
| WHL-125 | $1 "$ | 25 mm | $11 / 32^{\prime \prime}$ | 8.7 mm |
| WHL-138 | $1-1 / 2^{\prime \prime}$ | 38 mm | $7 / 16^{\prime \prime}$ | 11.1 mm |
| WHL-150 | $2 "$ | 50 mm | $1 / 2^{\prime \prime}$ | 12.7 mm |
| WHL-162 | $2-1 / 2^{\prime \prime}$ | 62 mm | $11 / 16^{\prime \prime}$ | 17.5 mm |

## PLASTIC SPOOL WHEELS

Plastic thread spools, a unique and economical method for wheels. Use our TBL-10 Colored Tubing for axles. When used with Tire-48 (below), they make perfect wheels and tires for cars and other motorized vehicles. Sold in bags of 10 pieces only.

CODE: REEL-40

## RUBBER TIRE MATERIAL

Black rubber pipe insulation ideal for making tires when used with our REEL-40 Plastic Wheels (above). 1-1/2" (38mm) O.D., $7 / 8^{\prime \prime}(22 \mathrm{~mm})$ I.D., and 24 " $(600 \mathrm{~mm})$ long.

CODE: TIRE-48

## D \& T TECHNOLOGY AND EDUCATION

## MINIATURE GEAR BOX

## CLEARBOX GEAR BOX

Multi-ratio gearing system in a clear Polycarbonate frame provides adjustable power for unlimited uses. Simple press-fit motor allows motor exchange without fuss. The gear box is a multi-stage spur gear type. Changing gears is almost as simple as changing the motor.
Gear Box consists of:
11.5 -6 Volt, 6000 RPM Motor with pinion gear

1 ClearBox gear box
3 Nylon spacers/position rings
6 30/10 Tooth gears with pinions
132 Tooth gear
1 5/32" (4.0mm) O.D. x 4-1/8"(105mm) axle
2 3/32" (2.4mm) O.D. x 3/4" (19mm) axles
CODE: GEARBX-2

## AXLES \& AXLE BRACKETS

A selection of Axles/Shafts in steel, brass and Polyester reinforced with fibreglass. While all materials should be cut with a hacksaw or equivalent, the Poly/fibreglass material is easiest. The Poly/fibreglass material may be glued with epoxy cement and is quite strong, lightweight and ideal for young students.

| CODE | ACTUAL SIZE |  |  |  | MATERIAL |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | O.D. |  | LENGTH |  |  |
| AXLE-275 | 5/64" | 2.0 mm | 3" | 75 mm | Steel |
| AXLE-2910 | 5/64" | 2.0 mm | 18" | 450 mm | Poly/Fibreglass |
| AXLE-3150 | 1/8" | 3.2 mm | 6" | 150 mm | Steel |
| AXLE-3910 | 1/8" | 3.2 mm | 18" | 450 mm | Poly/Fibreglass |
| AXLE-4910 | 5/32" | 4.0 mm | 18 | 450 mm | Poly/Fibreglass |
| AXLE-6910 | 1/4" | 6.4 mm | 18" | 450 mm | Poly/Fibreglass |
| AXLE-24300 | 3/32" | 2.4 mm | 12 " | 300 mm | Steel |
| AXLE-24301 | 3/32" | 2.4 mm | 12 " | 300 mm | Brass |
| AXLE-64450 | 1/4" | 6.4 mm | 18 " | 450 mm | Steel |

An easy method for mounting axles to almost anything. May be screwed or glued. Strong plastic may also be drilled to accept other diameter Axles. Sold in bags of 10 pieces only.

|  | TO FIT |  |
| :--- | :--- | :--- |
| CODE | AXLE O.D. |  |
| AXBKT-2 | $5 / 64^{\prime \prime}$ | 2.0 mm |
| AXBKT-4 | $5 / 32^{\prime \prime}$ | 4.0 mm |

## D \& T TECHNOLOGY AND EDUCATION

## INDIVIDUAL PLASTIC GEARS \& RACK

STYLE D

Whatern
STYLE F
STYLE E

STYLE G

A selection of Plastic Gears, available individually, for designing any number of working mechanisms, from vehicles to power generators to conveyor systems. These gears are all high quality, Precision Injection Molded in the listed Plastic. Style B Gears have Brass hubs, with set screws, to ensure a positive fit. All others are designed for a tight press fit.

## D \& T TECHNOLOGY AND EDUCATION

## PLASTIC GEAR SETS

## DELUXE GEAR SET

A complete package of gears and accessories Precision Injection Molded in Nylon plastic. This hard plastic provides excellent power transmission.
Gear Set consists of:
410 Tooth gears, $1 / 2^{\prime \prime}(12.7 \mathrm{~mm})$ O.D.
420 Tooth gears, 7/8" (22.2mm) O.D.
430 Tooth gears, $1-1 / 4^{\prime \prime}(31.8 \mathrm{~mm})$ O.D
440 Tooth gears, 1-5/8" (41.3mm) O.D.
450 Tooth gears, 2" (50.8mm) O.D.
2 Worm gears, 11/32" (8.7mm) O.D.
2 Worm gears, 9/16" (14.3mm) O.D.
2 each of the following:
$1 / 8$ " ( 3.2 mm ) x $2^{\prime \prime}$ ( 50 mm ) axles
$1 / 8^{\prime \prime}(3.2 \mathrm{~mm}) \times 2-3 / 4^{\prime \prime}(70 \mathrm{~mm})$ axles $1 / 8^{\prime \prime}(3.2 \mathrm{~mm}) \times 3-3 / 4^{\prime \prime}(95 \mathrm{~mm})$ axles $1 / 8^{\prime \prime}(3.2 \mathrm{~mm}) \times 4-3 / 4^{\prime \prime}(120 \mathrm{~mm})$ axles $7 / 32^{\prime \prime}(5.6 \mathrm{~mm}) \mathrm{W} \times 2$ " $(50 \mathrm{~mm})$ L racks

Gears are $1 / 4 "(6.4 \mathrm{~mm})$ wide, allowing for easy alignment, with a .110 $(2.8 \mathrm{~mm})$ shaft hole to fit our $1 / 8^{\prime \prime}(3.2 \mathrm{~mm})$ O.D. axles. Worm gears have a $.070(1.8 \mathrm{~mm})$ shaft hole to snugly fit our MOT-1 and MOT-2 Motors.

CODE: GEARS-34

## DOUBLE GEAR SET

A complete package of gears and accessories Precision Injection Molded in Nylon Plastic for high quality at reasonable prices. This hard plastic provides excellent power transmission. Gear Set consists of:
$430 / 10$ Tooth gears, $5 / 8^{\prime \prime}(15.9 \mathrm{~mm})$ O.D.
4 48/12 Tooth gears, 1 " ( 25.4 mm ) O.D.
$450 / 10$ Tooth gears, 1 " ( 25.4 mm ) O.D.
4 62/10 Tooth gears, 1-1/4" (31.8mm) O.D.
$448 / 12$ Tooth gears, $1^{\prime \prime}(25.4 \mathrm{~mm})$ O.D. (. $120(3.0 \mathrm{~mm})$ shaft hole-free spin)
2 Worm gears, 15/64" (6.0mm) O.D. (. 070 ( 1.8 mm ) shaft hole)
2 Crown wheels, $17 / 32$ " ( 13.5 mm ) O.D.
110 Tooth pinion, $15 / 64^{\prime \prime}$ ( 6.0 mm ) O.D. (. 070 ( 1.8 mm ) shaft hole)
112 Tooth pinion, $1 / 4^{\prime \prime}(6.4 \mathrm{~mm})$ O.D. (. 070 ( 1.8 mm ) shaft hole)
112 Tooth pinion, $1 / 4^{\prime \prime}(6.4 \mathrm{~mm})$ O.D. ( 110 ( 2.8 mm ) shaft hole)
$21 / 8^{\prime \prime}(3.2 \mathrm{~mm}) \times 2 "(50 \mathrm{~mm})$ axles
$21 / 8^{\prime \prime}(3.2 \mathrm{~mm}) \times 2-3 / 4^{\prime \prime}(70 \mathrm{~mm})$ axles
$21 / 8^{\prime \prime}(3.2 \mathrm{~mm}) \times 3-3 / 4^{\prime \prime}(95 \mathrm{~mm})$ axles
2 1/8" (3.2mm) x 4-3/4" (120mm) axles

Gears are $.070(1.8 \mathrm{~mm})$ wide. All shaft holes are $.110(2.8 \mathrm{~mm})$ (unless noted otherwise) to fit our $1 / 8{ }^{\prime \prime}(3.2 \mathrm{~mm})$ O.D. axles. Those with a $.070(1.8 \mathrm{~mm})$ shaft hole are designed to snugly fit our MOT-1 and MOT-2 Motors.

CODE: GEARS-35

## VARIABLE AXLE GEAR SET

Five sets of four different Gears with Axle Reducers and Gear Rack. Injection molded in High Impact Polyethylene for long life and quiet operation. $1 / 4^{\prime \prime}(6.4 \mathrm{~mm})$ thickness allows easy handling and alignment for students of all ages.
Each set consists of:
110 Tooth gear, $7 / 16^{\prime \prime}$ ( 11.1 mm ) O.D.
120 Tooth gear, 7/8" (22.2mm) O.D.
130 Tooth gear, 1-1/4" (31.8mm) O.D.
140 Tooth gear, 1-5/8" (41.3mm) O.D.
$35 / 32$ " ( 4.0 mm ) to $1 / 8^{\prime \prime}(3.2 \mathrm{~mm})$ axle reducers
1 1/4"( 6.4 mm ) Wide $\times 3^{\prime \prime}(75 \mathrm{~mm})$ Long gear rack
Smallest gear has a $.070(1.8 \mathrm{~mm})$ shaft hole to snugly fit onto our MOT-1 and
 MOT-2 Motors. All others have a 156 ( 4.0 mm ) shaft hole to fit our $5 / 32$ " ( 4.0 mm ) O.D. axles. Axle reducers allow simple conversion to $.110(2.8 \mathrm{~mm})$ shaft hole for our 1/8" (3.2mm) axles.

CODE: GEARS-40

## D \& T TECHNOLOGY AND EDUCATION

## PULLEYS \& PROPELLERS

## PULLEYS WITH SET SCREWS

Professional quality Nylon Pulleys with Brass Set Screw Hubs for secure installations. Designed for use with $3 / 32$ " ( 2.4 mm ) axles, however, the Brass Hubs may be drilled out to fit larger axles.

|  | ACTUAL |  |
| :--- | :--- | ---: |
| CODE | O.D. |  |
| PULY-210 | $3 / 8^{\prime \prime}$ | 9.5 mm |
| PULY-213 | $1 / 2^{\prime \prime}$ | 12.7 mm |
| PULY-219 | $3 / 4^{\prime \prime}$ | 19.1 mm |
| PULY-225 | $1 "$ | $25.4 m \mathrm{~m}$ |
| PULY-232 | $1-1 / 4^{\prime \prime}$ | 31.8 mm |

## 3 BLADE PROPELLER

This $5^{\prime \prime}(125 \mathrm{~mm})$ Dia. plastic propeller can be easily adapted to fit on our MOT-1 and MOT-2 Motors for use as a fan, or can be fitted on many other driving devices for air or water projects.

CODE: PROP-3

## PROPELLER WITH DRIVE SHAFT

1" O.D. ( 25 mm ) Plastic propeller attached to a $5 / 64$ " $(2.0 \mathrm{~mm}) \times 7-1 / 2^{\prime \prime}$ $(190 \mathrm{~mm})$ long shaft inside a $6^{\prime \prime}(150 \mathrm{~mm})$ long Brass tube housing. Use our HOSE-1 Flex Tubing as a universal joint for coupling to a drive source.

CODE: PROP-1

| SCKT-5 | LED |
| SCKT-10 | Standard Round |

## BUZZER

Miniature Buzzer designed to operate on 9V D.C. current. Maximum output 83 dB , with a frequency of approximately 420 Hz Dimensions approximately $1^{\prime \prime}(25.4 \mathrm{~mm}) \times 3 / 4^{\prime \prime}(19.1 \mathrm{~mm}) \times 3 / 4^{\prime \prime}(19.1 \mathrm{~mm})$.

CODE: BUZZ-9

## SINGLE \& DOUBLE POLE TOGGLES

Single pole, 2 lug on/off for 1 amp current, and double pole, 6 lug switch for reversing polarity on low voltage DC motors, toggle switches.

|  |  |
| :--- | :---: |
| CODE | DESCRIPTION |
| TOGL-1 | Single Pole |
| TOGL-2 | Double Pole |

## D \& T TECHNOLOGY AND EDUCATION

## HARDWARE \& MISCELLANEOUS

## COLLARS WITH SET SCREWS

A simple and effective method for securing gears, pulleys, wheels, etc.
Sold In bags of 10 pieces only.

|  | TO FIT |  |
| :--- | :--- | :--- |
| CODE | AXLE O.D. |  |
| COLAR-2 | $5 / 64 "$ | 2.0 mm |
| COLAR-3 | $1 / 8^{\prime \prime}$ | 3.2 mm |
| COLAR-4 | $5 / 32^{\prime \prime}$ | 4.0 mm |

## AXLE HUB CAPS

Spring steel Hub Caps designed for metal axles. Push fit allows easy and fast installation or removal.
Sold in bags of 20 pieces only.

|  | TO FIT |  |
| :--- | :--- | :--- |
| CODE | AXLE O.D. |  |
| HUB-3 | $1 / 8^{\prime \prime}$ | 3.2 mm |
| HUB-4 | $5 / 32^{\prime \prime}$ | 4.0 mm |
| HUB-6 | $1 / 4^{\prime \prime}$ | 6.4 mm |

## AXLE REDUCER

Allows axle reduction from $5 / 32^{\prime \prime}(4.0 \mathrm{~mm})$ to $3 / 32^{\prime \prime}(2.4 \mathrm{~mm})$. Simple push-fit sleeve gives you the option of incorporating different gearing systems onto one common size of axle. Sold in bags of 20 pieces only.

CODE: RED-42

## FLEX SPRING DRIVE BELT

$12^{\prime \prime}(300 \mathrm{~mm})$ long flexible steel spring driving belt. To assemble, screw ends together. Two or more may be coupled together where longer lengths are needed.

CODE: BELT-300

Approximately 100 assorted Springs in several lengths, diameters, tensions and styles.
CODE: SPRG-100

## D \& T TECHNOLOGY AND EDUCATION

## HARDWARE \& MISCELLANEOUS

## SPROCKET CHAIN

$1 / 4^{\prime \prime}(6.4 \mathrm{~mm})$ wide, 36 " $(914 \mathrm{~mm})$ long, 4 links per inch ( 25.4 mm ). Use with assorted gears as a drive mechanism. May also be used as a gear rack by pinning down on a flat surface.

CODE: CHAIN-5

## PLASTIC SPROCKET CHAIN \& GEARS

$1 / 8^{\prime \prime}(3.2 \mathrm{~mm})$ I.D., $26-3 / 8^{\prime \prime}(670 \mathrm{~mm})$ long, 3 links per inch ( 25.4 mm ), assemble your own plastic chain with 3 plastic sprocket gears. Easy snap together assembly add fun to the project and takes only a few minutes to complete. Gears have a $5 / 32$ " ( 4.0 mm ) shaft hole, and are a 10 tooth ( $27 / 32^{\prime \prime}\left(21 \mathrm{~mm}\right.$ ) O.D.), 20 tooth ( $1-27 / 32^{\prime \prime}(47 \mathrm{~mm}$ ) O.D.), and 30 tooth ( $2-27 / 32^{\prime \prime}(72 \mathrm{~mm}$ ) O.D.). Use with furnished gears as a drive mechanism. May also be used as a gear rack by pinning down on a flat surface.

CODE: CHAIN-10

## CLEAR FLEXIBLE TUBING

Silicone clear flexible tubing in $3^{\prime}(1 \mathrm{~m})$ lengths. Ideal for water or air. Not recommended for viscous liquids.

| CODE | ACTUAL SIZE |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  | O.D. |  | I.D. |  |
| HOSE-1 | $1 / 8^{\prime \prime}$ | 3.2 mm | $1 / 16 "$ | 1.6 mm |
| HOSE-2 | $7 / 32^{\prime \prime}$ | 5.6 mm | $3 / 32^{\prime \prime}$ | $2.4 m \mathrm{~mm}$ |
| HOSE-3 | $1 / 4^{\prime \prime}$ | 6.4 mm | $1 / 8 "$ | 3.2 mm |

## PVC TEE

Plastic 3-way Tees to fit HOSE-3 (Clear Flexible Tubing).
CODE: TEE-13

## RUBBER BANDS

1 lb . (. 45 kg .) box of size No. 16 rubber bands for use as drive belts. Can be used with or without Pulleys.

CODE: BAND-16

## CABLE TIES

White nylon Cable Ties for binding wires or components. Ideal for securing Motors in place.
Sold in bags of 10 pieces only.
CODE: CT-6

## ENGINEERING \& ARCHITECTURAL BOOKS \& KITS

DESIGN MODEL TRAINING MANUAL
Written for upper level education, this book explains the uses and limitations of models as an engineering tool. The goals include becoming familiar with the uses of models, thinking in three dimensions, broadening the students piping background as well as step-by-step instructions to constructing the Kit at right. During the model construction, students learn machinery use and safety, blueprint reading, modeling procedures and piping design. Written by ENGINEERING MODEL ASSOCIATES, INC. 136 pages.

CODE: MAN-2

## INTRODUCTION TO DESIGN MODELING

Written for high school, community college or vocational level schools. Developed in a format to give hands-on learning of design modeling. The course is similar in content to our MAN-2, except in a simpler form. Includes step-by-step instructions to construct the Kit at right. A course outlined teachers guide is available upon request. Written by ENGINEERING MODEL ASSOCIATES, INC. 56 pages.

A step-by-step companion to MAN-2. Includes all the components necessary to construct an exact prototype of a professional piping design model.
Scale:
$3 / 8^{\prime \prime}=1^{\prime}-0^{\prime \prime}(1: 32)$
CODE: KIT-5002

A step-by-step companion to MAN-5. Includes all the components necessary to construct an exact prototype of a simple professional piping design model.
Scale: $3 / 8^{\prime \prime}=1^{\prime}-0^{\prime \prime}(1: 32)$
CODE: KIT-5005

## BASIC DESIGN MINI-KITS

Four contiguous Kits developed as an introductory process model training program. Each Kit may be used as a stand-alone section or combined sequentially with one another. Ideal for high school level education. Each Kit includes instructions and necessary materials. Scale: $3 / 8^{\prime \prime}=1^{\prime}-0^{\prime \prime}(1: 32)$

CODE: KIT-5007A

CODE: KIT-5007C

CODE: KIT-5007B

CODE: KIT-5007D

## RAILROADING MODELS BOOK

## THE CYCLOPEDIA OF INDUSTRIAL MODELING

Author Dean Freytag is widely known for his vast knowledge in the field of industrial models, steel mills and general scratchbuilding. This book is a must for all scratch model builders. It's a 90 page 'step-by step' book with color pictures featuring numerous industrial model projects.

CODE: BOOK-115

## D \& T TECHNOLOGY AND EDUCATION

## DESIGN TECHNOLOGY STARTER PACKS

## COLORED TUBING \& CONNECTORS

Plastic Colored Round Tubing and Coated Wire in several sizes and multiple colors along with various connectors. All components are designed to work together. Provides a quick and easy way for educators to order a basic supply of model materials. Not developed to create specific items, but to provide a useful range of products for general model making and prototype design. Working tips and material properties are included within the Pack. Contains enough materials for a classroom of approximately 20 students. Over 180 products.
Contents include:

- Plastic Colored Tubing in 5 Diameters
- Plastic Colored Coated Wire
- Plastic Elbows
- Plastic Snap-On Tees
- Plastic End Caps

## CODE: PACK-101

## CLEAR ACRYLIC SHAPES

A general assortment of clear and fluorescent colored acrylic rod and shapes for jewelry, decoration and furniture projects. Great for craft and scientific light transmission projects. Provides a quick and easy way for educators to order a basic supply of model materials. Not developed to create specific items, but to provide a useful range of products for general model making and prototype design. Working tips and material properties are included within the Pack.
Over 130 products. Contents include:

- Clear Round, 1/2 Round and Square Rod
- Clear Balls and Cubes
- Clear Hemispheres
- Fluorescent Round Rod

CODE: PACK-103

## SQUARE \& RECTANGULAR TUBING

Plastic Square and Rectangular Tubing in several sizes. All components are manufactured in sturdy ABS plastic, allowing extremely strong construction. Great for general structural construction. Many sizes of square tubing telescope, which is especially useful in robotics. Provides a quick and easy way for educators to order a basic supply of model materials. Not developed to create specific items, but to provide a useful range of products for general model making and prototype design. Working tips and material properties are included within the Pack. Contains enough materials for a classroom of approximately 20 students. Over 35 products. Contents include:

- Plastic Square Tubing
- Plastic Rectangular Tubing
- Plastic Strip Material
- Plastic Tubing Assembly Components

CODE: PACK-102

## TOOLS \& CEMENTS

Basic Hand Tools and Cements for plastic model parts construction. PLASTRUCT Plastic Weld Cement, CYA glue and 15 minute Epoxy cement should answer all bonding needs. Safe-to-use cutting tools and cement applicators also included. Provides a quick and easy way for educators to order a basic supply of model construction tools. Contains two each of the hand tools, and enough cements for a classroom of approximately 20 students to share.
Over 35 products. Contents include:

- PLASTRUCT Plastic Weld Cement
- Solvent Cement Applicators
- CYC and Epoxy Glues
- Electricians Tape
- ZONA Hand Saws \& Rep. Blades
- Hobby Model Knives
- Hobby Mitre Boxes

CODE: PACK-104

## DESIGN TECHNOLOGY STARTER PACKS

## POWER CENTER

A general assortment of motors and related gears, axles, battery holders and clips, etc. to fabricate working models. Also includes some tubing and other assorted components. Ideal as a companion Pack for all other Starter Packs. Provides a quick and easy way for educators to order a basic supply of accessory products. Not developed to create specific items, but to provide a useful range of products for general model making and prototype design. Working tips are included within the Pack. Contains enough materials for a classroom of approximately 20 students.
Over 400 products. Contents include:

- Small Electric Motors
- Plastic Gears and Wheels
- Steel Axles
- Battery Holders and Clips
- Plastic Tubing and Profiles
- Plastic Tubing Components

CODE: PACK-105

## SPACE FRAME KITS

## PINCO SPACE FRAME KIT

Originally developed for interior display design, this fast and simple system allows construction of the pictured structure without tools or cements; snap together assembly.
Kit consists of 20 White Butyrate Plastic six way connectors, ten White Butyrate Plastic diagonal connectors, $402^{\prime \prime}(50 \mathrm{~mm})$ White Butyrate Plastic tubes and five $1-5 / 8^{\prime \prime}(40 \mathrm{~mm})$ White Butyrate Plastic tubes. Color may be added by using our $3 / 16^{\prime \prime}(4.8 \mathrm{~mm})$ O.D. colored tubing (Code TBL-6*).

CODE: KIT-5211
COMPONENT PARTS AVAILABLE SEPARATELY
6-Way Connector
CODE: PIJ-6
Diagonal Connector $1-5 / 8^{\prime \prime}$ ( 40 mm ) Tubing
CODE: PID-2
CODE: PIT-2
$2^{\prime \prime}(50 \mathrm{~mm})$ Tubing
CODE: PIT-3

* Add color designation to code. i.e.: TBL-6R (Red).

## RACERS PROJECT PACK

The Racers Project Pack is designed as an easy to use system for the design and construction of battery powered vehicles. Because assembly is so easy, the main emphasis of instruction can be on investigation and design. The end result is a product economical enough to be consumable, or capable of being dismantled and the components reused. Most parts simply snap together. Construction ideas and details are included on an illustrated sheet within the Pack. Contains enough materials for a classroom of approximately 20 students. Over 150 products.
Contents include:

- Plastic Colored Tubing and Connectors
- Plastic Wheels
- Rubber Tire Material
- Small Electric Motors
- Battery Holders and Wiring Clips

CODE: PACK-201

## PEN RESTYLE PROJECT PACK

The Ball Point Pen Restyle Project Pack provides limitless opportunities for expression of individual tastes in prototype and packaging design. Suitable for students of various age groups, and differing abilities, this project offers simple constructability and an end product the student can use daily with pride. Required tools can be as simple as small handsaws and pinvises, or computer controlled lathes for those schools with high-tech equipment. Complete outline of all facets of construction, packaging and project summarization are included in a 7 page instruction packet within the Pack. Contains enough materials for a classroom of 20-40 students. Over 300 products.
Contents include:

- Plastic Round Colored Tubing
- Tubing Connectors and End Caps
- Plastic Square Tubing
- Plastic Strip Material
- Pen Refills and Pocket Clips

CODE: PACK-203

## STORAGE CONTAINERS PROJECT PACK

The Storage Containers Project Pack contains a wide range of products suitable for designing and constructing an extensive variety of small containers. The objective is to produce imaginative and creative solutions to storage problems, not to produce a quantity of identical units. The geometric nature of the containers make such products an excellent vehicle for sketching and rendering techniques in addition to evaluative modeling in waste materials. These materials can be worked with common hand and machine tools. Construction ideas and details are included on an illustrated sheet within the Pack. Contains enough materials for a classroom of approximately 20 students. Over 90 products.
Contents include:

- Plastic Round Colored Tubing
- Tubing End Caps
- Plastic Profiles
- Square and Rectangular Tubing

CODE: PACK-202

## TRUSS BRIDGE PROJECT PACK

The Truss Bridge Project Pack was originally developed for the more advanced hobby modeler but fits nicely in the engineering module of a Design \& Technology program. Students construct a typical single span truss bridge using miniature plastic representations of structural members in 1:48 scale. These Steel Gray, professional scale model materials can be worked with common hand and machine tools. Drawing blueprints and details are included with step-by-step instructions within the Pack. Contains enough materials to construct five 5 " $(125 \mathrm{~mm})$ W x 30 " $(750 \mathrm{~mm}) \mathrm{L}$ bridges. Nearly 200 products.
Contents include:

- Plastic H Columns
- Plastic I Beams
- Plastic Channels
- Plastic Tees
- Plastic Strip Material

CODE: PACK-204

[^0]:    Photo courtesy of Alan Graziano, South Plainfield, NJ

[^1]:    ** Two 4" Pieces

[^2]:    NOTE: 15 " ( 375 mm ) Length.

[^3]:    Photo courtesy of Alan Graziano, South Plainfield, NJ

[^4]:    NOTE: $17-1 / 2^{\prime \prime}(450 \mathrm{~mm})$ Length.
    Clear Acrylic Rectangular Rod is also available at double the shown length for twice the listed price. Just add 'L' to the end of the Product Code.
    Example: ARR-9L

[^5]:    (1) Also available in 24 " x 14 " ( $600 \mathrm{~mm} \times 350 \mathrm{~mm}$ ) Sheet Size; add "XL" to end of Code, i.e. PS-29XL
    (2) Also available in twice the Horizontal Length ( 22 " or 24 " ( 550 mm or 600 mm ) ) Sheet Size; add "L" to end of Code, i.e. PS-32L
    (3) Also available in Clear for use as Doll House Shower Glass. Code is PS-23

[^6]:    ASPHALT SHINGLE O (1:48) SCALE CODE: PS-115
    $12^{\prime \prime} \times 7^{\prime \prime}(300 \mathrm{~mm} \times 175 \mathrm{~mm})$ (GRAY)
