SPECS

No matter the size of your SCX, the fun is always big. The 1:32 scale Classic and Advance ranges feature the most advanced technology, and the tracks are designed to get the maximum performance out of the motors. The smaller Compact range is the gateway to the SCX world—easy to play with and handle.

TECHNOLOGY

SCX, a pioneer in the world of racing tracks, has revolutionized the industry with technological advances that combine precision and excitement. From digital control systems that allow multiple players to race simultaneously, to improvements in track and car design that faithfully reproduce iconic models, SCX continues to stand out. Its commitment to innovation and quality has cemented its leadership in scaled motorsport entertainment.

NEW TRACK

UPGRADABLE DIGITAL TRACK SYSTEM

The new track for the Classic system allows you to **easily digitize your setup**, opening up a world of possibilities for enjoying car racing with much more realism.

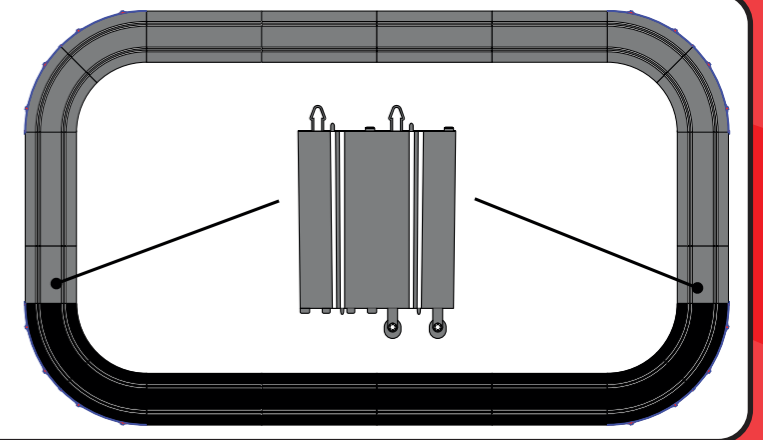

All these new features make the digital system **far more interactive**, allowing you to:

- Race with **up to 9 cars at once** on a single 2-lane track.
- Execute **real overtakes** from any lane.
- Plan race strategies by **changing lanes, taking the curves on the inside, and blocking opponents** by positioning yourself ahead to prevent them from overtaking.

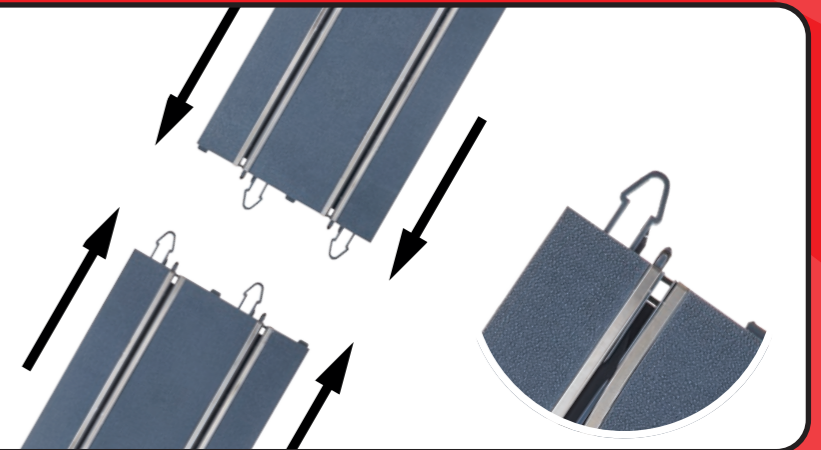

COMPATIBLE TRACKS

The new circuits can be combined with the **entire range of SCX 1:32 tracks and sets** released so far, thanks to specially designed **compatibility track pieces**.

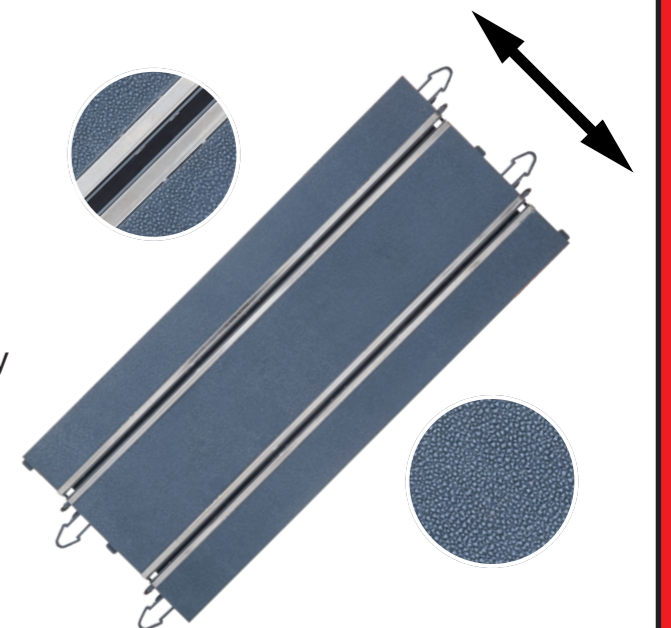

EASY-ASSEMBLY TRACKS

The new track system makes setting up circuits **quicker and easier**, thanks to its **improved connectors**, allowing you to **save time on assembly and start racing in no time**.

The new track system, while maintaining the **high-quality standards of all SCX tracks**, offers the following performance improvements:

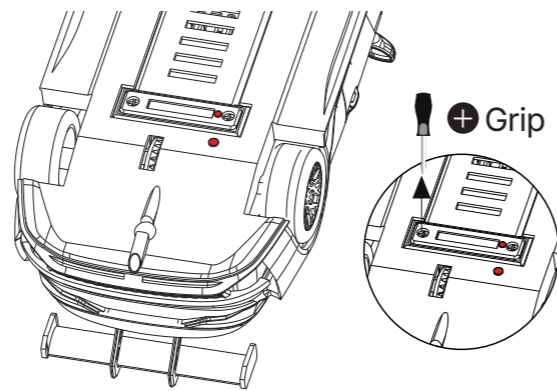

- **Plastic side rails** that enhance the car guide's sliding and steering.
- **Wider and more stable tracks**, allowing for more precise and effective driving.
- **Technical materials** that provide greater flexibility and durability for building any circuit.
- **High-grip, uniform surface**, improving the vehicle's dynamic performance on the track.

ADVANCED CAR TECHNOLOGY

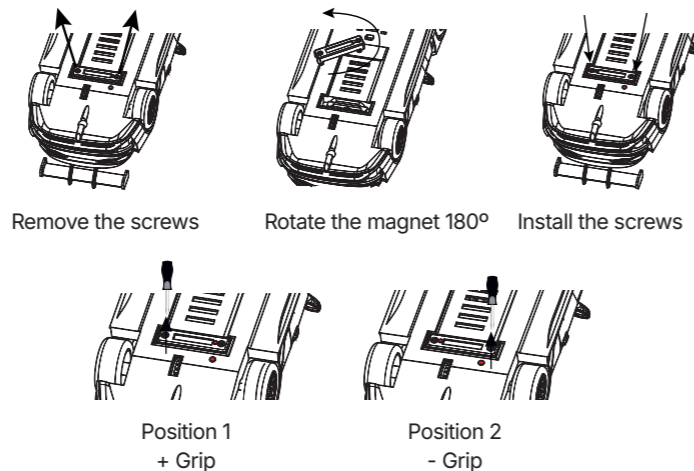

A-STANDARD POSITION

This is the car's factory default position for the magnet. In this setting, the magnet can only lower (never raise), giving your car better grip on the track

B-ADJUSTABLE POSITION

If you want to adjust your car's magnet position, follow these steps:

Motors: SCX has developed an extensive range of high-performance, highly reliable motors for its cars, allowing you to choose the model that best suits your track and driving style.

Tilting Chassis: This type of chassis allows the car to adapt better to the track, making it easier to drive while enhancing performance.

High-Intensity Lights: On car models equipped with lights, xenon-effect lights are included, making races even more spectacular.

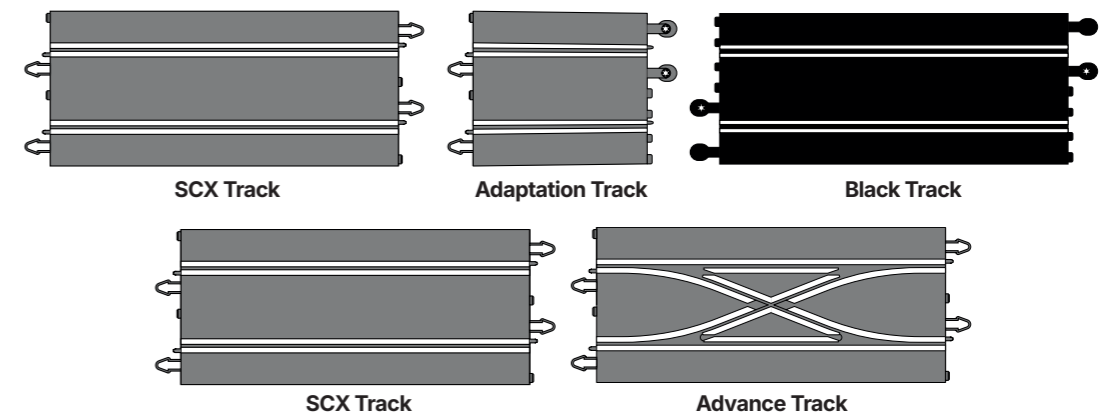

Automatic Guide Return System

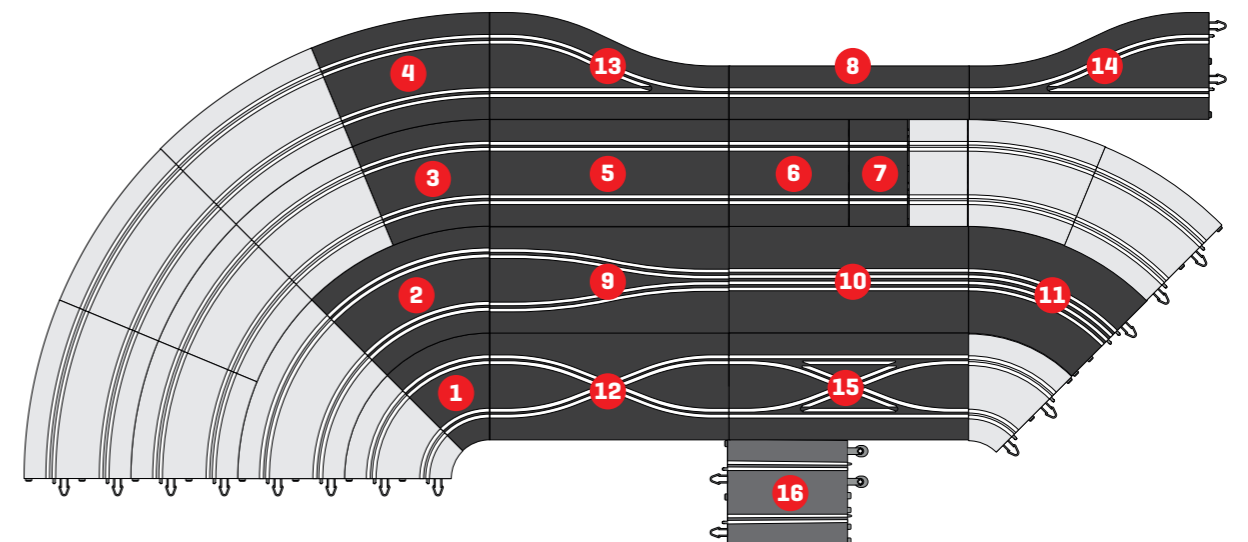

TRACK COMPATIBILITY

SCX tracks are fully compatible with Advance tracks and with Black tracks (using the adaptation piece).

Black tracks are not compatible with Advance tracks.

TRACK SYSTEM

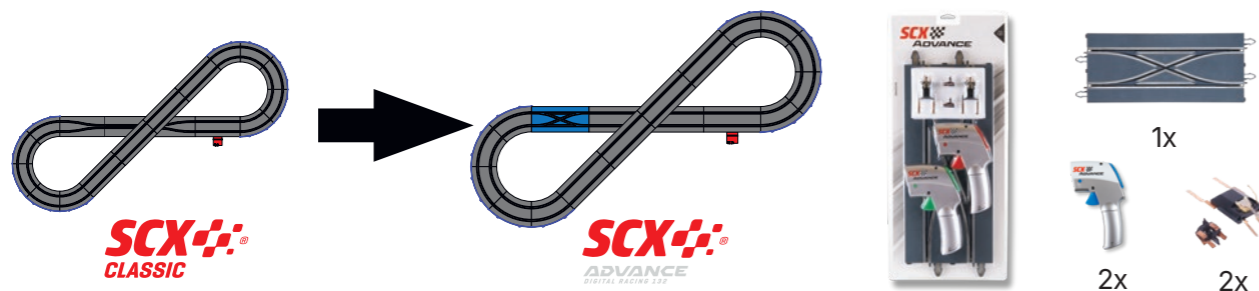

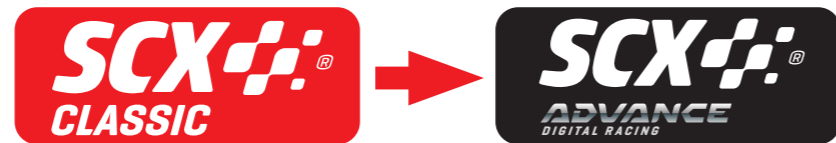

- | | | |
|--------------------------|--------------------------|------------------------------------|
| 1 Inner Curve (R1) | 6 180 mm Straight | 11 Chicane Curve |
| 2 STD Curve (R2) | 7 80 mm Straight | 12 Change Lane |
| 3 Outer Curve (R3) | 8 1 Lane 360 mm Straight | 13 14 Advance Left & Right Turnout |
| 4 Outer Outer Curve (R4) | 9 In/out Chicane | 15 Advance Change Lane |
| 5 360 mm STD Straight | 10 Chicane Straight | 16 Adaptation Track |

COMPATIBILITY

SCALE 1:32

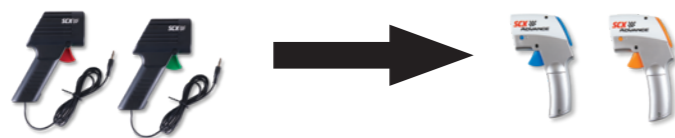

CONVERT YOUR CIRCUIT

- 1 Replace a 360 mm straight section in your track with the lane-change track

- 2 **Converting a SCX Classic Car to SCX Advance**
Replace the **contact holder** with the **Advance chip**. See the **Classic-to-Advance car section** for details.
- 3 Replace the analog controllers with the new wireless Advance controllers.
Do not connect the analog controllers to the connection track.

RECHARGE AND SET UP YOUR STRATEGY

Pick your fuel and refuel your cars in the Pit Lane!

DRIVE LIKE NEVER BEFORE

Wireless controllers with a high-sensitivity system for the most experienced drivers.

TIME YOUR LAPS

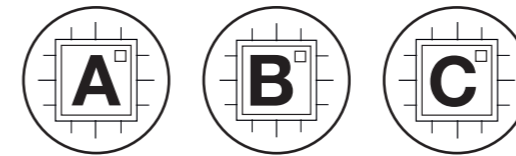

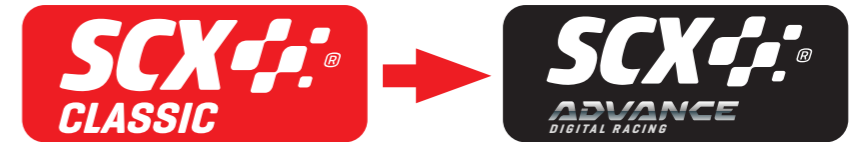

Connect the track via **Bluetooth** to your tablet or smartphone and add more realism to the race.

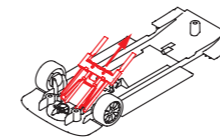

OVERTAKE

Race against your friends by **changing lanes with up to 9 cars!**

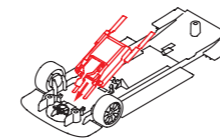

CAR CONVERSION

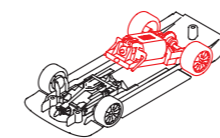

To convert your Classic car to Advance, you need to **install the corresponding chip: A, B, or C**, and replace the Classic guide with the Advance guide.

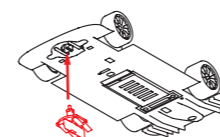

Remove the contact holder completely from the chassis

Once the contact holder and analog guide are removed, **install the Advance electronics and guide**. Insert the **Advance electronic module** until it is securely held by the rear tabs

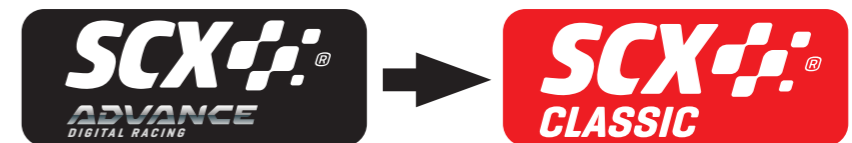

Fit the motor assembly, inserting it first into the rear chassis slot. Press the front part until it is fully seated in the chassis.

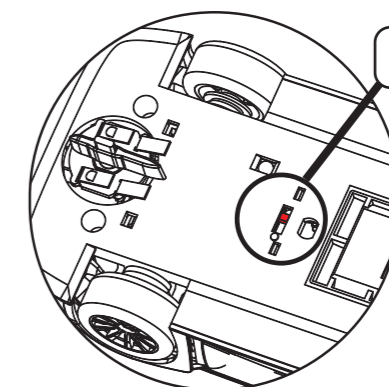

Insert the Advance guide and **reassemble the body shell**.

CAR CONVERSION

By changing the switch on the underside of the car, you can convert your Advance car back to Classic.

SCX **SCALE 1:32**

The SCX 1:32 range invites you to experience the thrill of motorsport like never before. Designed to offer maximum precision and detail, this scale combines realism, speed, and fun. It also takes a leap into the future with SCX Advance—the most advanced technology that elevates your races to the next level—allowing you to enjoy app-based control, multiple cars on the track, and total customization.

With models faithful to the original cars and circuits brimming with possibilities, SCX 1:32 is the perfect gateway to a world of innovation and adrenaline.

Feel the passion for racing from the comfort of your home!

MERCEDES - BENZ 300 SL COUPÉ

24H LE MANS 1956

(Paul Metternich & Wittigo von Einsiedel)

Probably no other Mercedes is as famous worldwide as the 300 SL. Considered one of the first supercars in history, its combination of **design and technology** made the "Gullwing" a legend from the moment it was unveiled.

At SCX, we have **replicated every specific detail of this model**: front bonnet latches, indicator lights on the fenders, transparent windshield, auxiliary front lights, taped headlights, and more.

A true **limited-edition gem**, designed for **authentic SCX collectors only**.

SKODA FABIA RS RALLY2 - SLOT.IT

SCX PRO is the new line designed for the most demanding enthusiasts, combining SCX's tradition with cutting-edge technical precision.

Within this range, we present the Škoda Fabia RS Rally2 - Slot.it, a model that takes on-track performance to a whole new level.

The car features a high-quality scale reproduction of the Škoda Fabia, along with the **engineering and technology of Slot.it**, an undisputed leader in high-performance slot racing.

Its design and components are engineered to deliver greater stability, precision, and competitiveness on the track.

With this model, SCX Pro establishes itself as the clear choice for **advanced users**, expanding the brand's universe into a more technical and professional arena.
